

WARLOCK

Pathfinder 1e Homebrew Class — Revised Master

The warlock does not learn magic. She binds it.

Power is not gathered through study, but through claim, contract, and configuration. Blades, relics, and soul constructs are not tools—they are expressions of authority.

Class Progression

Lvl	BAB	Fort	Ref	Will	Special	Blend	Util	CL	Magatama
1	+0	+0	+2	+2	Casting, blended training, dark wards, infernal blades, dark lore, soul arts, infernal art	0	0	0	—

20	+15/+10/+5	+6	+12	+12	Archfiend form	15	10	15	6

Infernal Arts are gained at 1st level and every two levels thereafter (10 total by 19th level). Magatama talents shown are talents available to each active Magatama.

The warlock does not learn magic. She binds it. Power is not gathered through study, but through claim, contract, and configuration. Blades, relics, and soul constructs are not tools—they are expressions of authority. Where others cast, the warlock decides. Where others prepare, the warlock chooses what is allowed to happen.

Acrobatics (Dex), Bluff (Cha), Climb (Str), Craft (Int), Diplomacy (Cha), Intimidate (Cha), Perception (Wis), Perform (Cha), Profession (Wis), Sense Motive (Wis), Spellcraft (Int), Use Magic Device (Cha). Skill Ranks per Level: 6 + Intelligence modifier.

Class Skills

Proficiencies

Hit Dice

Warlocks are proficient with simple weapons, light armor, and bucklers. If this is the character's first level in any class, she may select a martial tradition of her choice. A warlock does not rely on tools for survival—but she does not reject them either. Anything that can be brought under control is worth using.

AC and CMD. She gains an additional +1 bonus at 2nd level and every 4 levels thereafter. This bonus applies to touch AC and while flat-footed. Lost while wearing armor or using a shield. Does not stack with the monk AC bonus. The warlock is not protected by armor, but by refusal. Attacks that would strike her instead encounter resistance—not physical, but imposed.

Her soul is not a passive vessel. It is an active system—capable of shaping, storing, and expressing power independently of external structure.

Infernal Blades (Su)

Casting

A warlock is a Mid-Caster and uses Charisma as her

casting ability modifier. She gains a casting tradition and 2 bonus talents at 1st level. The warlock does not practice magic—she compels it. Magic does not obey her because it must. It obeys because it has already been decided that it will.

Spell Pool

A warlock gains a spell pool equal to her level + her Charisma modifier (minimum 1). This pool replenishes after 8 hours of rest. This pool does not measure how much power she possesses, but how much she is willing to exert without consequence.

Blended Training (Ex)

A warlock gains a combat or magic talent every time

she gains a class level. She uses her Charisma modifier as her practitioner modifier.

Dark Wards (Su)

While unarmored and not carrying a shield, the warlock adds her Charisma modifier (minimum +2) to

At 1st level, the warlock manifests an array of up to six infernal blades that hover behind her. When she makes an attack, she may use one blade as either a ranged weapon attack (25 ft + 5 ft per 2 warlock levels) or a melee weapon attack.

Infernal blades deal damage as one-handed slashing

weapons (1d8 for Medium, 1d6 for Small). A used, thrown, or destroyed blade reforms at the end of the warlock's turn. Infernal blades count as magic weapons for overcoming damage reduction but cannot be enhanced as manufactured weapons. These blades are not summoned—they are remembered. Each one is a fragment of will given form, returning not because it must, but because it already belongs.

Infernal Steps (Su)

As part of her movement, the warlock may embed blades into solid surfaces as temporary footholds, allowing Climb checks even on surfaces that would not normally support them. The environment is not an obstacle—it is something to be adjusted.

Spear Stretcher (Su)

The warlock may use two blades as a makeshift

stretcher to move a helpless or willing creature without needing free hands. Movement speed is reduced as normal. The blades return to the array once the creature is set down.

The blades exist to serve purpose. If that purpose changes, they do not resist.

The warlock gains the Leadership sphere as a bonus

sphere. Followers are not gathered—they are aligned.

Magatama (Su)

At 2nd level, the warlock may customize magatama.

Each magatama grants access to sphere talents

according to the Talents per Magatama progression.

The warlock may only benefit from one active

magatama at a time and may switch between them as a swift action. A magatama is not an accessory. It is a configuration of the self.

Changing it does not grant new power—it determines which

version of the warlock is currently present.

2. Champion (Ex)

The warlock gains the Champion feat as a bonus feat. She must meet all prerequisites. Excellence is not pursued. It is declared and enforced through action.

3. Focusing Claim (Ex)

Whenever the warlock uses Dark Claim, she also regains her martial focus. Attention sharpens when a decision is made. Claim establishes clarity.

4. Friends on the Other Side (Su)

Dark Claim (Su)

At 2nd level, as a swift action, the warlock may Claim an opponent within close range (25 ft + 5 ft per 2 levels). The effect lasts for a number of rounds equal to 1/2 her class level (minimum 1). She may maintain Claims equal to her Charisma modifier (minimum 1). The warlock automatically knows the position of Claimed creatures, though normal concealment and miss chance still apply. To Claim is not to mark—it is to decide. Once chosen, the

target exists within her awareness and authority. Distance and concealment do not remove it—they only delay interaction.

The warlock maintains contact with extraplanar

merchants. As a full-round action, she may sell an item regardless of location, receiving 125% of the item's normal sale value for dangerous, restricted, cursed, or difficult-to-sell goods. Cannot be used to sell artifacts or plot-critical items. Nothing is unsellable—only improperly negotiated.

5. Self-Reliant Hunter (Ex)

Whenever the warlock gains a morale bonus to one of

her ability scores, that bonus increases by +2. Once per round, she may use the aid another action on herself as a swift action. Dependence is unnecessary. Support can be self-imposed.

Infernal Grace (Su)

At 3rd level, the warlock gains a bonus equal to her Charisma modifier (if any) on all saving throws. Effects do not fail because they cannot reach her. They fail because they are not accepted.

Infernal Arts

At 3rd level and every 2 levels thereafter, the warlock gains an Infernal Art. Each may be selected only once unless otherwise noted. Infernal Arts are not techniques to be learned or discoveries to be made. They are permissions the warlock grants herself—new ways in which her authority is allowed to manifest.

1. Dark Legion (Ex or Su)

6. Rapid Magatama Change (Ex)

The warlock may change her active magatama as a free

action instead of a swift action. Adaptation is not reactive—it is immediate.

7. Infernal Familiar (Su)

The warlock gains a familiar as a wizard of her warlock

level. She may instead choose a creature from the druid's animal companion list, functioning as both a familiar and an animal companion using her warlock level as effective druid level –3 (minimum 1). Companionship is not chance—it is selection.

8. Cross Training (Ex)

Available at 5th level or higher. The warlock selects one 1st-level class feature from another class. She gains this feature at half her warlock level (minimum 1). This does not grant BAB, saves, or caster level from that class. May be selected only once.

Boundaries between disciplines are artificial. What exists can be taken.

Servants are not separate—they are extensions.

9. Advanced Training (Ex)

The warlock adds her class level as a bonus on

Diplomacy checks to negotiate monetary rewards, fees, bounties, or material compensation. When conducting negotiations with deliberate courtesy, she gains +2 on

Diplomacy and Sense Motive checks but takes –2 on

Intimidate checks.

Requires Cross Training. Available at 7th level or higher. The warlock gains additional class features from the chosen class, using her warlock level –2. This does not grant BAB, saves, or caster level. Expansion is not imitation—it is integration.

10. Ki Cultivator (Ex)

The warlock gains Cultivate Ki as a bonus feat. She must meet all prerequisites. Energy is not categorized. It is repurposed.

11. Enchanted Wards (Su)

The warlock's Dark Wards gain a +1 enhancement bonus. This increases by +1 at 4th level and every 4 levels thereafter. Protection can be reinforced—not through material, but through insistence.

17. Negotiation, My Dear (Ex)

Agreement is a tool. Tone determines outcome.

18. Crest of the Betrayer (Su)

The warlock gains the Crest Magic sphere as a bonus

feat. She may store and release spells through crests manifested within her body. Power does not need to be held—it can be embedded.

19. Dark Rejuvenation (Su)

As a full-round action, the warlock may consume a soul resource to heal 1d6 hit points + her Charisma modifier per two warlock levels.

12. True Pure Body (Ex)

Recovery is not granted. It is taken.

From the level she selects this art onward, the warlock gains the maximum result on her Hit Die each time she gains a warlock level.

20. Home Sweet Home (Su)

The body no longer develops randomly. Its growth is determined.

13. Kindled Essence (Su)

The warlock gains an essence pool equal to her warlock

level + her Charisma modifier. Essence is not acquired—it is drawn into alignment.

14. Akashic Understanding (Su)

The warlock unlocks the following chakras: hands, head, feet, headband, shoulders, wrists, belt, and neck.

She may shape veils from the Promethean and Vizier

lists, as well as Oni Swordmaster's Pauldron, Reaper's Glaive, and Warlock's Warblade. Knowledge is not learned. It is accessed.

15. Energy Nexus (Su)

As a full-round action, the warlock may convert one type of energy (spell points, ki, or essence) into another. She may convert up to her Charisma modifier each use. This ability cannot create a net gain of resources. To the warlock, these are not different systems—only different states of the same force.

16. Advanced Shikigami (Su)

The warlock's shikigami may benefit from integrated

soul talents as defined by the shikigami subsystem.

Available at 14th level or higher. The warlock gains create demiplane and plane shift as spell-like abilities, each usable once per day. Location is no longer fixed. The warlock determines where she belongs.

21. Infernal Treasures (Su)

The warlock gains the Transcendent Akashic Treasury

class feature. Wealth is not accumulated—it is bound and retained.

22. Contract Expertise (Ex or Su)

The warlock gains a +4 bonus on checks to negotiate, draft, interpret, or analyze contracts. She may use Charisma in place of Intelligence to identify loopholes.

When conducting negotiations with deliberate

courtesy, +2 on Diplomacy and Sense Motive checks but –2 on Intimidate checks. Terms are not followed—they are defined.

Uncanny Dodge (Ex)

At 4th level, the warlock cannot be caught flat-footed and does not lose her Dexterity bonus to AC against invisible attackers. If she already has uncanny dodge from another class, she gains improved uncanny dodge instead.

Bleak Prophecy (Su)

At 10th level, creatures Claimed by the warlock become shaken while the Claim persists. Those marked by the warlock begin to understand—if only briefly—that their outcome has already been considered. Few withstand that realization without faltering.

Improved Uncanny Dodge (Ex)

At 12th level, the warlock can no longer be flanked, unless the flanking creature possesses at least four more levels in a class that grants sneak attack than she has warlock levels.

Archfiend Form (Su)

At 20th level, the warlock permanently becomes an outsider (native) with the evil and extraplanar subtypes. She chooses one fiend subtype—devil (lawful), demon (chaotic), or daemon (neutral)—which cannot be changed. She gains: darkvision 60 ft (or +30 ft to existing), DR 10/good, energy resistance 10 to fire and one additional type, immunity to poison and disease, no longer needs to eat/sleep/breathe, constant tongues (self only), spell resistance 11 + warlock level, and +4 Charisma. As a native outsider, she may still be raised or resurrected. Effects targeting humanoids no longer affect her; effects targeting outsiders or fiends now apply. At the height of her power, the warlock ceases to resemble what she once was. She becomes a fixed point of authority—no longer merely interacting with power, but embodying it.

Designer's Note: Cross-System Compatibility The warlock's infernal creations — Infernal Blades, Infernal Chain Array, Infernal Marionette Frame, and their ACF replacements — are designed to interact with external upgrade and progression systems.

Rules governing this compatibility are covered in the

Subsystems chapter under Infernal Matrix and Infernal Object

Qualification. GMs running campaigns that incorporate Materia, Item Worlds, Spell Gems, awakening systems, or similar external frameworks should consult those rules before play begins.

ALTERNATE CLASS

FEATURES

Each ACF replaces one or more core class features. A warlock may combine compatible ACFs freely unless an ACF explicitly restricts further substitutions.

Bound Mech (Su) — Replaces: Infernal Blades, Infernal

Steps, Spear Stretcher

The warlock forges a pact not with a weapon, but with a constructed body: a bound mech. This mech functions using the Arcforge mech rules. The warlock counts as a Mech Master (or Helmsman) for all purposes, using her warlock level as her effective level and her Charisma modifier in place of Intelligence or Wisdom for all mech-related checks. The mech is not equipment. It is not a companion. It is a configured extension of the warlock's will.

Summon Vessel (Su)

By spending 1 spell point as a standard action, the warlock calls her mech to an unoccupied space within 30 feet. If destroyed, dismissed, or absent, it may be summoned again in this way. The warlock does not travel to the mech. The mech is brought into alignment with her position.

Control Lock (Ex)

The warlock and mech share a single action economy.

The mech cannot take actions unless the warlock

spends the corresponding action to direct it. Any attack, spell, or ability used through the mech counts as the warlock's action for the turn. The mech does not act on its own. It executes decisions that have already been made.

Arcane Conduit (Su)

The mech functions as a casting origin. The warlock may cast spells as though originating from the mech's space and may choose whether a spell originates from her or from the mech. Touch spells may be delivered through the mech's attacks.

Mechanical Presence (Ex)

While piloting her mech, the warlock is treated as occupying the mech's space for attacks, targeting, and effects. Effects that would target the warlock instead interact with the mech unless they explicitly affect the pilot directly.

Integrated Engine Protocol (Optional Synergy)

If the warlock possesses both Bound Mech and Bound

Ride, the two bonded constructs merge into a single integrated construct that counts as both for all purposes. The warlock continues to act through a single shared action economy. The construct may shift between forms (vehicle, humanoid mech, hybrid) as a swift action. Changing form does not restore hit

points, reset cooldowns, or remove conditions. The machine is not two servants. It is one answer wearing different shapes.

Guardian-Bound — Replaces: Magatama (all instances) At 2nd level, the warlock forges a pact with a powerful Guardian spirit. She gains the Guardian class feature as described in the Ravager class, using her warlock level as her effective Ravager level for all Guardian abilities and scaling. All references to magatama now refer to her active Guardian and its associated talents.

Switching between Guardians is performed as a swift action.

This choice is not the acquisition of a companion—it is the acceptance of oversight. The warlock does not merely command the Guardian. The Guardian observes, shapes, and enforces. Power is no longer configured internally, but mediated through a presence that does not forget, does not weaken, and does not misinterpret intent. Where other warlocks change themselves, the GuardianBound warlock allows something else to remain constant.

Dark Fashionista (Infernal Regalia) — Replaces: Dark Wards (and all upgrades thereof)

The warlock manifests the Infernal Regalia—a complete expression of authority through form, presence, and presentation. As a swift action, she may summon or dismiss the Regalia. This is not armor. It is recognition made visible.

Deflection Field (Su)

While wearing the Infernal Regalia and remaining unarmored and unencumbered, the warlock gains a deflection bonus to AC, touch AC, and CMD equal to her Charisma modifier (minimum +1). Lost if she wears medium or heavy armor or becomes encumbered.

Talon Bracers of Sinfire Grace (1st level)

The warlock may deliver touch spells as though using spellstrike. She may perform somatic components even while her hands are occupied. At 5th level, +1 on concentration and SR checks. At 10th level, cast a touch spell as a swift action once per day.

Talon Bracers of Infernal Pulse (Alternate, chosen at 1st level) The warlock gains Infernal Pulse: a ranged touch attack (60 ft range) dealing 1d6 + Charisma modifier damage as fire or force (chosen each use), scaling to 6d6. May fire Infernal Pulse once per round as a free action when casting a harmful spell. It may also deliver touch spells.

Diadem of the Temptress (3rd level)

+2 on Bluff and Diplomacy checks; may always take 10 on these when not threatened. At 5th: mirror image 1/day. At 10th: mirror image 2/day.

Wyrdbeast Companion

While the Regalia is manifested, a massive spectral beast (typically panther-like) moves alongside the warlock. Functions as an animal companion using warlock level –2 as effective druid level. Uses Charisma modifier in place of Strength for damage rolls. Shares saving throws against curse effects. Reforms the next time the Regalia is manifested if destroyed. Hexbound Roar (7th): 20-ft-

radius roar 1/day; Will save or shaken 1 round. Cursefang (11th): on bite, target takes –2 on saves against warlock's hexes until start of her next turn. Spectral Hunt (15th): teleport 20 ft as a move action. This is not a companion. It is a reflection given motion.

Regalia-Bound Infernal Arts

1. Sinful Presence

Creatures treat the warlock's first offensive action each encounter as non-hostile unless they succeed at a Sense Motive check opposed by her Bluff or Perform. On failure, they are flat-footed against that action.

2. Honeyed Blade

When the warlock deals damage with a melee touch attack, natural weapon, or unarmed strike, the target must succeed at a Sense Motive check opposed by her

Bluff or Perform or take –2 on Will saves against her abilities until the end of her next turn.

3. Kiss of Theft

When Honeyed Blade causes a failure, the warlock gains temporary hit points equal to 1/2 her class level + Charisma modifier.

4. Scarlet Logic

Soul damage and touch-delivered spells ignore DR, alignment resistance, and smite or anti-evil bonuses against targets that failed to identify the warlock's attack.

5. Velvet Pulse

Once per encounter, the warlock may deliver a single target harmful spell as a swift action through Honeyed Blade, provided she has made a qualifying attack this turn.

6. Mirror of Desire

Creatures affected by Kiss of Theft take –2 on Will saves against the warlock's abilities.

7. Sovereign Claim

When a Mirror of Desire-affected creature is reduced to 0 HP by the warlock, she gains 1 Sin Point (maximum 1, lasting 1 minute): +2 to charm/fear DCs, +1 CL vs SR, +1 damage die on Honeyed Blade. Spend as a swift action to regain a spell slot, maximize Honeyed Blade damage, or reroll a social check.

8. Forbidden Step

When a creature within 10 ft attacks the warlock, she may move 5 ft as an immediate action before the attack roll. If this causes the attack to miss, her next Honeyed Blade deals +2d6 soul damage.

9. Crown of Decadence

When the warlock spends a Sin Point, all enemies within 10 ft must succeed at a Will save (DC 10 + 1/2 level + Cha) or become shaken for 1 round and take –2 on Perception checks to identify her actions while shaken.

Masquerade Mask & Crimson Veil

While the Regalia is manifested, the warlock is treated as a Non-Combatant until she deals damage or forces a saving throw. Her Sin aura is suppressed. Once per encounter as a swift action, she may remove the veil: creatures within 15 ft must save (DC 10 + 1/2 level + Cha) or become shaken and flat-footed against her.

Crimson Masquerade Arts

1. Masquerade Persona

The warlock counts as a Non-Combatant until she attacks. Her first offensive action does not provoke

AoOs unless the target succeeds at Sense Motive

opposed by Perform (Dance).

2. Veiled Motions

The warlock may draw weapons or ready items while performing without breaking Non-Combatant status.

3. Stagecraft

Exospine — Replaces: Magatama (and all upgrades thereof) At 1st level, the warlock undergoes the Rite of Insertion, implanting the Exospine—a biomechanical lattice fused to her nervous system, bone, and will. It is an integrated system: a framework of steel, essence, and pact-forged circuitry that processes intent faster than flesh can respond. All references to magatama instead refer to the Exospine's configurations, modifications, and installed protocols. This choice is irreversible.

+10 to Stealth while performing in plain sight. May conceal actions such as poisoning, casting, or preparation within performance.

The warlock does not wear the Exospine. She becomes compatible with it.

4. Soft Touch Delivery

Operating the Exospine at combat output generates

Heat. When Heat reaches its maximum threshold, the warlock must Vent. Upon venting, until the start of her next turn: −2 penalty to AC, and any attack that qualifies for precision damage automatically applies it, regardless of positioning or concealment.

The warlock may deliver contact poisons, touch spells, and soul effects as part of a social interaction, resolved as Perform (Dance) opposed by Sense Motive.

5. Scarlet Coup

First damaging action while treated as Non-Combatant

deals +1d6 soul damage per 5 class levels. Target is flatfooted. Once per encounter.

6. Velvet Assassination

If Scarlet Coup reduces a target to 0 HP, the warlock either regains one expended spell slot or gains +2 to the save DC of her next spell. If the target was Goodaligned, the recovered slot is of the highest level expended.

7. Mask of Innocence

When the warlock kills a creature while treated as NonCombatant, observers must succeed at Sense Motive (DC 10 +

class level + Cha) or believe the death was accidental. +10 to Diplomacy to leave the scene without suspicion.

8. Blood on Silk

Once per encounter after Mask of Innocence triggers, the warlock may be escorted or moved by NPC logic as though still considered a Non-Combatant.

9. Final Encore

After a successful assassination, the warlock may reveal her identity. All enemies within 15 ft must save or become shaken for 1 round and flat-footed against her. Once per encounter. The Dark Fashionista does not wear power. She ensures it is seen— and understood too late.

Heat & Venting

Heat represents not failure, but excess—more output than the system is designed to contain without consequence. The Exospine does not prevent overload. It ensures that overload is survivable.

Exospine-Specific Infernal Arts

Overheat Gambit (Ex)

When at maximum Heat, the warlock may choose not to vent until after her next attack. If that attack is made against a Claimed target, it deals additional damage equal to her Barrier Hit Dice. After resolving the attack, she vents normally.

Soul-Cooled Overdrive (Su)

When venting, the warlock may expend 1 captured soul from the Soul sphere. If she does, the AC penalty is reduced to −1 and attacks do not automatically apply precision damage.

Target Sync Array (Su)

While Heat is below half its maximum, the warlock gains +2 on attack rolls and +4 on Perception checks against Claimed targets.

Infernal Mod Protocol (Su)

Once per day, the warlock may instantly swap one

Exospine Modification or Auxiliary Core as if

reconfiguring during downtime. This change lasts until her next long rest.

Hellforge Spinecraft (Su)

The Exospine counts as an Akashic veil for the purpose

of rune and gem binding. Each rune or gem invested reduces Heat gained per turn by 1 (minimum 0). Systems do not compete—they integrate.

per 2 warlock levels each round for 1d4 rounds (Reflex negates).

The warlock does not leave hazards behind—she leaves

consequences.

Boom Javelin (Ex)

Bound Ride — Replaces: Infernal Grace (3rd level) At 3rd level, the warlock forges a bond with a vehicle— motorcycle, muscle car, infernal engine, spectral steed, or arcforge construct. This functions as the Bound Vehicle ability from the Demon Rider, using the warlock's level as her effective Demon Rider level. The warlock gains +4 on Ride or Drive checks while using her Bound

Ride. The vehicle ignores mundane fuel requirements and operates at full efficiency regardless of terrain. Once per day while in contact with her Bound Ride, the warlock restores hit points equal to 5 × her warlock level. The warlock does not pilot the vehicle. The vehicle responds. Motion is no longer traversal—it is control over space itself.

Driving Authority

While mounted on or integrated with her Bound Ride, the warlock ignores difficult terrain and may maneuver with supernatural precision. The path ahead is not discovered—it is enforced.

Bound Ride Infernal Arts

Ghost Rider Chain (Ex)

The warlock gains a Hellfire Chain (15-ft reach, functions as a spiked chain). Once per round on a successful hit, she may attempt a free trip combat maneuver. At 10th level, attacks deal an additional 1d6 fire damage, and she may drag struck creatures 10 feet toward her (Reflex negates).

Once per round, as part of a charge or Ride-By Attack, throw an explosive javelin dealing 4d6 fire + 4d6 piercing damage in a 10-foot burst (Reflex half). At 10th level, creatures struck are subject to knockback.

Nitrous Boost (Ex)

Once per combat as a swift action: +30 feet movement for 1d4 rounds, +2 AC against ranged attacks while boosted.

Phantom Tandem (Su)

If the warlock moves at least 30 feet in a round, one ally riding with her may make a single attack as a swift action.

The Druid Plow (Ex)

The Bound Ride gains +2 on bull rush and overrun attempts and increased ramming damage. If the warlock charges at least 30 feet, the target must succeed at a Fortitude save or be staggered for 1 round.

Creatures at least one size smaller than the vehicle are

automatically knocked prone. Obstacles are not avoided—they are displaced. The Bound Ride warlock does not navigate the battlefield. She defines how it is traversed.

SAM Engine — Replaces: Magatama and Soul Sphere (all instances)

Oil Slick (Ex)

At 1st level, the warlock undergoes the SAM Integration Ritual, fusing the System for Adaptive Modularity (SAM) into her body, armor, or augmentation framework. She gains the SAM Sphere (including the Tinker sphere it requires) as bonus spheres at no cost. She uses Intelligence as her key ability modifier for SAM sphere abilities unless otherwise specified.

Once per combat as a swift action, deploy a 10-foot-radius oil slick behind her. Creatures entering or standing in the area must succeed at a Reflex save or fall prone.

All references to magatama or magatama talents

instead refer to her active Paradigm and its assigned talents. All references to the Soul Sphere instead refer to SAM Sphere abilities.

Flaming Exhaust (Ex)

The warlock no longer configures power through identity or spirit. She processes it.

Infernal Garage (Su)

The warlock may swap her Bound Ride: 1/day with a 10-minute ritual. At 10th level: 1/hour with a 1-minute ritual. At 15th level: once per combat as a swift action.

If a creature passes through or ends its turn in the oil

slick, it ignites. Affected creatures take 1d6 fire damage

Adaptive Modularity

The SAM Engine operates through Paradigms—structured states of operation. Each Paradigm represents a complete operational profile, including talent access, system behavior, and interaction rules. Switching Paradigms alters not just available abilities, but how those abilities are executed.

System Integration

Actions are resolved through structured execution. Effects are routed through defined subsystems. Resources are tracked, converted, and deployed with precision. There is no improvisation. Only optimization.

Each tattoo has a Tattoo Potency equal to 1 + 1/2 warlock level (rounded down). Many tattoo effects scale based on this value.

Omen Sight (Su) — Replaces Bleak Prophecy

+2 bonus on Sense Motive checks; use detect chaos/evil/good/law at will. Once per encounter, roll twice on a saving throw against charm, curse, or fear and take the better result. At 10th level, creatures affected by an Active or Brand Tattoo applied by the warlock become shaken while the effect persists. The warlock does not predict outcomes. She recognizes patterns that have already begun.

Resource Equivalence

Passive Tattoos

Within the SAM framework, spell points, essence, and other energies are treated as inputs—interchangeable under the correct processes. The warlock does not draw from different sources. She allocates.

1. Serpent Coil

Paradigm Control

The warlock maintains one active Paradigm at a time.

Changing Paradigms requires adherence to SAM's

operational rules but does not represent hesitation or delay. See the SAM Sphere entry for complete rules. The SAM Engine does not empower the warlock. It ensures that nothing she does is inefficient.

+1 competence bonus to Reflex saves (+1 at 5th and every 5 levels). Add Tattoo Potency as a bonus to Acrobatics. Sustained: +Tattoo Potency dodge bonus to AC vs AoOs; on a successful Acrobatics check to avoid an AoO, move an additional 5 ft.

2. Iron Script

+1 natural armor (+1 at 7th and every 7 levels) and DR 1/magic (up to DR 5/magic). Sustained: replace natural armor bonus with a deflection bonus equal to Tattoo Potency; DR becomes DR 1/2 Tattoo Potency/—.

3. Raven Eye

Tattooed Mystic — Replaces: Dark Claim, Bleak

Prophecy

The warlock's body becomes a living grimoire. Eldritch sigils, curse-brands, beast marks, or technomantic runes manifest across her skin as her power develops.

These markings are declarations—each one records

authority, binds intent, and preserves effects that would otherwise fade.

Tattoo Slots

The warlock gains 3 Tattoo Slots at 1st level, plus 1 additional slot at 3rd level and every 3 levels thereafter, to a maximum of 9 slots at 18th level. Tattoos may be reassigned during a 1-hour ritual. Tattoos are divided into three categories: Passive Tattoos (always active), Active Tattoos (require an action to activate), and Brand Tattoos (minor passive + powerful active, 1/encounter). Some tattoos include a Sustained entry; the warlock may sustain a number equal to 1 + 1 per 5 class levels.

Tattoo Potency

Low-light vision and +2 to initiative. At 10th: darkvision 60 ft. Sustained: See Invisibility (continuous); +Tattoo Potency to Perception.

4. Devil Ink

+2 to Intimidate; +1 DC on fear effects. At 10th: confirming a critical hit shakes the target for 1 round. Sustained: 10-ft aura of unease (–1 to saves vs fear and charm); may demoralize all enemies within 30 ft as a free action when reducing a creature to 0 HP.

5. Vital Pulse

Increase maximum HP by 2 x Tattoo Potency. Sustained: fast healing 1, +1 per 5 levels (max fast healing 5).

6. Spirit Coil

Once per encounter, reroll a failed Will save (must accept second result). Sustained: +Tattoo Potency to Will saves; may expend the sustain as an immediate action to partially resist a mind-affecting effect.

7. Living Ink

For each point of Tattoo Potency, gain one tattoo talent. May be reassigned each rewriting ritual.

8. Tiger's Vigil

+1 to Perception and Sense Motive; +1/2 Tattoo Potency dodge bonus to AC vs flanking. At 10th: immune to shaken. Sustained: cannot be flanked (exceptions apply); on a melee miss, take a 5-ft step as an immediate action.

1/encounter: 15-ft cone of energy (type chosen at inscription); 2d6 + Tattoo Potency damage (Reflex half). Sustained: re-use every 1d4 rounds for Tattoo Potency additional uses.

16. Iron Body Seal

Immediate action: DR 5/— until start of your next turn. At 10th: DR 10/—. Sustained: DR 1/2 Tattoo Potency/— at all times; burst still usable but ends the sustain.

9. Serpent Scales Script

17. Azure Dragon Arc

+Tattoo Potency to Fortitude vs poison; +1 initiative; +1 Reflex at 5th and every 5 levels. Sustained: resistance to poison equal to 5 x Tattoo Potency; on a successful poison save, may reflect it to an adjacent creature.

Standard action: 30-ft line of force; 2d6 + Tattoo Potency force damage (Reflex half). At 10th: 40-ft line. Sustained: first creature damaged per round must save or be pushed 5 ft and cannot make AoOs until your next turn.

10. Dragon's Breath Hidden Flame

Fire resistance equal to Tattoo Potency. At 10th: melee attacks deal +1 fire damage. At 15th: +2 fire on critical hits. Sustained: fire resistance 5 x Tattoo Potency; attacks deal +Tattoo Potency fire damage; shed light as a torch.

Active Tattoos

11. Ember Lash

Standard action, ranged touch 30 ft. On hit, 1d6 + Tattoo Potency fire damage and ignited (1 fire damage/round for 3 rounds; Reflex negates). Sustained: Tattoo Potency fire damage/round; on target death, redirect remaining duration to another creature within 30 ft.

12. Storm Vein

Swift action: wielded weapon gains +Tattoo Potency electricity damage for 1 round. On critical hit, Fortitude save or target dazed 1 round. Sustained: bonus remains constant; first hit per round may force Reflex save to halve movement.

13. Shadow Grip

Standard action: target within 60 ft. On failed Will save, cursed for 3 rounds: penalty equal to Tattoo Potency on attacks and saves vs your abilities. Sustained: duration extends to concentration + 1 round; target takes 1 nonlethal damage/round/2 levels.

14. Hunter's Mark

Swift action: mark a creature within 60 ft for 1 minute. +2 to attack/damage vs target; allies gain +1 to attack. At 10th: +3 and +2. Sustained: transfer mark when target drops; once/round, reroll one damage die on a hit.

15. Dragon Breath Sigil

18. Tiger Claw Step

Swift action: +Tattoo Potency to next melee attack roll and damage roll this turn. That attack gains the trip special ability and does not provoke AoOs. On a successful trip, immediately take a 5-ft step. Sustained: apply bonuses once per round without spending actions; attempt trip as a free action once per round after a hit.

19. Coiling Serpent Bind

Standard action: ranged touch attack. On hit, target entangled 1 round and takes 1d6 + Tattoo Potency damage/round. At 10th: 2d6 + Tattoo Potency. Sustained: entangle duration extends to concentration (swift) + 1 round; +Tattoo Potency on CMB to trip or reposition the bound target.

20. Focus-Binding Script

Swift action: regain martial focus. Sustained: whenever you expend martial focus for a talent with a successful hit, you may immediately regain it once per round.

Brand Tattoos**21. Doom Coil (Brand)**

Passive: +2 to Intimidate. Active (1/encounter): standard action, target within 30 ft must save or be shaken for 1d4 rounds. Sustained: target cannot benefit from morale bonuses and takes –1 on attack rolls for the duration.

22. Phoenix Feather (Brand)

Passive: +Tattoo Potency to all healing received. Active (1/day): when you would drop below 0 HP, heal 1d6 + Tattoo Potency as an immediate action. Sustained: fast

healing 1 while below half HP; may grant the same healing to an ally within 30 ft as an immediate action when they would drop. free once per round; demoralized foes cannot charge you until your next turn.

23. Abyss Brand (Brand)

Passive: +Tattoo Potency to Perception and ranged touch attacks. Active (1/encounter — Dragonstrike Invocation): standard action, line 60 ft + 10 ft/level, 2d6 + Tattoo Potency force damage, ignores creatures and obstacles except solid walls 5 ft+. Sustained: re-fire every 1d4 rounds; creatures failing save by 5+ are knocked prone.

Passive: +1 DC on curse effects. Active (1/encounter): curse a 20-ft-radius area within 60 ft; creatures take 1d6 + Tattoo Potency untyped damage and –1 to saves vs your abilities for 1 round. Sustained: cursed creatures take 1 damage/round/2 levels while within 60 ft.

24. Moonflow Seal (Brand)

Passive: +2 to Stealth.

25. Warlord Ink (Brand)**30. Jade Dragon Script (Brand — Signature)****Major Tattoos (Tier Unlocks — choose one at**

levels 10, 15, 20; cannot be swapped)

Passive: allies within 10 ft gain +1 morale bonus to saves (+2 at 10th). Active (1/encounter): grant a willing ally within 30 ft an immediate 5-ft step and one attack. Sustained: allies within 20 ft gain +Tattoo Potency to initiative; when you activate a Brand Tattoo, one nearby ally may also gain the same passive effect for 1 round.

31. Eternal Fang**26. Chainbreaker Rune (Brand)**

+2 to all spell, talent, maneuver, and tattoo DCs. Sustained: advantage on concentration checks, spell attacks, and tattoo attack rolls.

Passive: +2 on saves vs paralysis, stunning, or grapple. Active (1/encounter): as an immediate action, remove one such condition from yourself. Sustained: immune to staggered; first time per round an enemy fails to grapple/entangle/restrain you, they are shaken for 1 round.

27. Kirin Stormbrand (Brand)

Passive: +1 resistance to electricity and +1 to Perception. Active (1/encounter): for 1 round, +Tattoo Potency electricity damage on melee attacks, enemies that hit you take 1 electricity damage, +10 ft movement. Sustained: movement cannot be reduced or impeded; move through hostile spaces without provoking AoOs once per round.

28. Oni Mask Brand (Brand)

Passive: +2 on saves vs mind-affecting. Active (1/encounter): for 1 round, +Tattoo Potency to Intimidate; first attack forces Will save or target is shaken for 2 rounds. Sustained: enemies reduced to 0 HP must save or become frightened for 1 round; gain telepathy 30 ft.

29. White Tiger Roar (Brand)

Passive: +1 dodge bonus to AC vs charge or rush attacks. Active (1/encounter): 15-ft cone roar; creatures must save or be frightened 1 round (success: shaken). Sustained: melee attacks gain the disarm maneuver for

On a confirmed critical hit, deal Tattoo Potency bleed damage/round for 3 rounds. Sustained: bleed becomes untyped spirit damage and stacks with itself; healing requires a caster level check vs your tattoo DC.

32. Starbrand Core**33. Oni Mark**

Once per encounter, double the damage of a melee attack after rolling. Sustained: +Tattoo Potency to melee damage rolls every round; immune to fear.

34. Lichscript Soul

Immunity to negative energy for 1 minute/day. Sustained: gain deathwatch; undead cannot target you with hostile spells unless they succeed on a Will save.

35. Solar Mandala

While above 50% HP, +2 to all saves. Sustained: shed light; fast healing 1; allies within 10 ft gain +1 to saves.

36. World-Serpent Sigil

1/day: enlarge or reduce yourself and gain DR 5/— for 1 minute. Sustained: reach +5 ft (stacking with size); any creature that attempts to grapple you takes Tattoo Potency damage.

SUBSYSTEMS

greater invisibility, irresistible dance 1/day, and bonuses against enchantment and illusion effects. Some agreements do not require visibility.

Parting the Veil [Companion, Psychic, Soul]

Warlock Invocations (Optional)

System)

Invocations are not gained automatically through

leveling. They must be acquired—through Infernal Arts, archetypes, bound systems, or other class features that explicitly grant access to them. Each invocation reflects a bound principle, entity, or domain that has been brought into alignment with the warlock's authority. Some are cooperative. Some are conditional. All are controlled. They are not expressions of the warlock. They are agreements.

Holocron of Darkness (Veil)

Descriptors:

Sphere

Shaper,

Dark

Armory. Prerequisites: Infernal Art class feature; access to the Soul sphere; ability to bind essence to at least one chakra. Slot: Shoulders, Wrist, or Hand. Shaping this veil manifests a large, bound tome—dark, weightless, and responsive. While shaped, the warlock may use a move action to consult the Holocron and utilize one of the invocations it grants. Essence must be bound to it rather than invested normally; each bound point unlocks further invocations per the binding progression. The Holocron cannot be bound to a chakra, but essence may be bound to it as though it occupied a chakra slot. Synergy — Warlock's Workshop: If the Holocron is shaped alongside the Warlock's Workshop veil, it may be placed upon the Workshop's lectern and gains additional functionality as defined in the Workshop's rules.

Invocation List

Midnight Rite [Companion, Charm, Fiend]

The warlock gains a Succubus Companion from the

Night Monarch class. The companion scales with her level and retains access to its talents, transformations, and synergy systems. This is not companionship. It is alignment of intent.

Fey Friend [Companion, Fey, Support]

The warlock gains a Pixie Companion using the

Improved Familiar chassis. The pixie has constant

The warlock gains a Cerebremancer Companion, a psychic entity with HP equal to half her own. This entity casts known psychic spells 1/day, may possess enemies (Will negates) for 1 round per level per day, and grants +2 on Knowledge (planes, arcana, psionics). Thought is no longer contained.

Umbra Sight [Perception, Shadow, Planar] The warlock may perceive the Umbra—seeing ethereal, incorporeal, undead, and shadow creatures; detecting planar overlaps; and gaining +2 on

saves vs illusions and concealment effects. What is hidden is not absent.

World Walker [Utility]

The warlock may shift between the Material Plane and

any perceived planar layer. Unlimited use outside combat. Once per encounter in combat (standard action to enter, move action to exit). Duration: 10 minutes per level. Cannot be used while immobilized or under dimensional lock. Movement is no longer restricted to space.

Grim Harvest [Soul, Harvest, Tome] As an immediate action, the warlock may bind the soul of a dying enemy. She gains access to one spell the creature knew, usable once per day. The effect fades after 24 hours. Costs 1 Soul Capacity. Nothing ends unused.

Dominion [Tome, Flexibility]

The warlock may spend 10 minutes to exchange any

number of active invocations with those stored in the Holocron. The Holocron may store additional invocations equal to 2 x Charisma modifier. Usable 1/day; additional uses require expending bound essence. Nothing is fixed.

Rites of Hexerai [Hex, Curse, Witchcraft]

The warlock gains access to Witch Hexes as a witch of

1/2 her level. Gains 1 hex upon acquiring this invocation, a Major Hex at level 10, and a Grand Hex at level 18. Uses per day: 3 + Charisma modifier. Control is not limited to one system.

Poe's Masquerade [Illusion, Shapeshift, Deception] The warlock gains advanced shapeshifting: Disguise Self to Alter Self to Beast Shape II progression. Duration: minutes per day equal to level. +10 to Disguise. Perfect aura and voice mimicry. Identity is adjustable.

The Holocron functions as a Bag of Holding Type I, gaining +50 lbs capacity per 2 essence bound. Retrieving items is a swift action.

Dark Wisdom [Knowledge, Infernal, Growth] The warlock gains 5 Infernal Arts of her choice. She may swap one Infernal Art each level. Additionally, +1 on Will saves vs good-aligned effects.

Dark Form [Shadow, Defense, Mobility]

Nothing remains inaccessible.

The warlock may become a living shadow for a number

of rounds per day equal to her level. While active: DR 5/good, 50% concealment in dim light or darkness, shadow-step teleport (60 ft as a move action), and immunity to mundane difficult terrain.

Nocturnal Arts [Akashic, Veil, Night]

Form is not permanent.

Accursed Blow [Curse, Strike] When making a melee attack, the warlock may curse the target (Will negates): –2 to attack rolls, saves, and skill checks for 1 minute. Usable once per round. Every strike may carry consequence.

The warlock gains access to the Nocturnal Arms veil

set. These veils count as +1 level for effects and DCs and may be shaped and bound as part of her veil list. Darkness is not absence—it is function.

Crimson Eye — Adyr's Gate [Planar, Infernal, Travel] 1/day, perform a limited plane shift to the Crimson Realm. Duration: 1 minute per 2 levels. While active: +2 resistance vs fire and charm effects. Risk: may gain Adyr's Mark upon return.

Sorcerous Blow [Strike, Spellstrike, Arcane]
Power is not free of consequence.
The warlock gains Spellstrike as a Magus, using Charisma instead of Intelligence. Stacks with Magus levels for Spellstrike.
Oni Sight — Gauntlet's Whisper [Planar, Oni, Perception]
Delivery is integrated.
Dominion of Soul [Soul, Harvest, Utility] When a creature dies within 30 ft: ask 3 questions as speak with dead; gain one of its feats or trained skills for 1 hour per level. Costs 1 Soul Capacity.
The warlock perceives the Oni Realm overlay. She gains darkvision 60 ft (or doubles existing), Aura Sight for Oni corruption and Genma essence, and the ability to see planar scars and soul residues. Each long rest, she must succeed at a Will save or gain an Oni Mark. Perception changes the observer.
Knowledge is transferable.
Crimson Tide [Blood, Shadow, Blast] 30-ft cone dealing 1d6 damage per level (max 15d6), split between slashing and negative energy (Will half).

Creatures slain rise as blood elementals for 1 minute
(maximum 2). Aftermath is part of the effect.
Infernal Garrison [Summon, Infernal, Army] 1/day, summon infernal soldiers as summon monster VI (lawful evil outsiders). Duration: 1 minute per level. When slain, these creatures explode dealing 1d6 damage per 2 levels in a 20-ft burst. Presence is temporary. Impact is not.
Five-Leaf Storage [Tome, Storage, Utility]

Eldritch Binder's Ring (Ex)
At 2nd level, the warlock may choose to replace Dark
Claim and Bleak Prophecy with the Eldritch Binder's
Ring subsystem. The warlock binds eldritch imprints— constructs of will and arcane resonance that emulate the function of rings without existing as tangible objects. These bound rings are not magic items, cannot be bought or sold, and do not occupy or interact with magic item slots.

Binding Rings

The warlock may bind rings whose effective caster level
does not exceed her warlock level. Binding or changing bound rings requires a 1-hour ritual. A ring must be present during this ritual, but is not required afterward.
Active: darkvision 60 ft (or +30 ft to existing). Passive: darkvision 30 ft (or +15 ft).

Ring Effects

Each ring grants a Passive Effect (always active while bound) and an Active Effect (a heightened expression, activated as a swift action unless stated otherwise). If both effects would overlap, only the active effect applies for the duration. A warlock cannot bind multiple copies of the same ring unless explicitly stated.
Bound ring effects do not stack with identical effects
from magic items; only the stronger applies.

Ring List — Book 1

- 1. Ring of Psychic Flames**
Active: melee touch attack (1d6 psychic + 1d4 fire); 1/day 10-ft-radius flame burst (2d6 psychic and fire, Reflex half). Passive: lesser version.
- 2. Ring of Endurance**
Active: immunity to fatigue, reduce exhaustion by one step. Passive: +2 Constitution.
- 3. Ring of Armor**
Active: +2 armor bonus to AC stacking with light armor (upgrades to +4 at higher levels). Passive: lesser bonus.
- 4. Ring of Akasha**
Active: unlocks a single veil slot and grants 1 essence. Passive: minor essence access.
- 5. Ring of Brawler**
Active: 1/day declare an unarmed attack a critical hit before rolling damage. Passive: proficiency with all unarmed strikes and +1 unarmed damage.
- 6. Ring of Darkvision**
Active
- 7. Ring of Ki**
Active: 1 spend 1 ki for +4 dodge AC or +20 ft movement 1 for 1 round. Passive: ki pool of 2 (or +2 to existing). 2

8. Ring of Djinn

Active: 3 Djinn companion per Sand Monarch rules; at 10th level gains major creation 1/day. Passive: lesser 3 companion. 4 4

9. Ring of Vaal

5

Active: 5 1 moldable talent per 2 warlock levels. Passive: 1 moldable talent.

10. Ring of Elementals

Active: 1d6 elemental damage on all attacks; element swappable 1/day at 10th. Passive: 1d4 elemental.

11. Ring of Mermaid

Active: Mermaid Form (swim speed = land speed, +4 Swim, breathe underwater, 1 min/Charisma modifier). Passive: +4 Swim and water breathing.

12. Ring of Improved Summons

Active: Dark Instrument summons gain +4 Str/Con, +2 morale to attack/damage, DR 5/magic at 10th. Passive: lesser.

13. Ring of Trap Sense

Active: at 10th level, immunity to magical trap triggered slow/entangle. Passive: +4 Perception to detect traps and +4 Reflex vs trap effects.

14. Ring of Luck

Active: 1/day reroll a failed save. Passive: +1 luck to all saves (+2 at 10th level).

15. Ring of Seduction

Active: enemies within 10 ft must save or take –2 to attack rolls for 1 round. Passive: minor social pressure aura.

16. Ring of Graceful Escape

Active: move through enemy spaces provoking AoOs. Passive: +10 to Acrobatics.
without

17. Ring of Moonlit Veil

Active: concealment for 1 round or until the warlock attacks. Passive: minor concealment in dim light.

18. Ring of Panache

Active: Panache pool (Cha modifier + 1/4 levels); access to Derring-Do and Opportune Parry/Riposte. At 6th: Spectacular Escape (1 Panache: 10-ft move without AoOs). At 12th: Captain's Flourish (2 Panache: move full speed and make one melee attack). Passive: minor dodge bonus.

19. Ring of Storage

Active: dimensional storage (250 lbs; 500 at 8th, 1,000 at 12th, 1,500 at 16th). Retrieve items as a swift action. Passive: storage access.

Active: speak Auran and cast gust of wind 1/day. Passive: resistance 5 electricity.

29. Ring of Grave Chill

Active: attacks deal +1d6 cold damage vs living for 1 minute; targets must save or be slowed 1 round (once/creature). Passive: cold resistance 5.

30. Ring of Opportunist's Fang

Active: +2 on AoOs and +1d6 precision damage when making them. Passive: +1 to attack rolls on AoOs.

20. Ring of Runic Shield**31. Ring of Astral Tether**

Active: temp HP pool equal to 5 x warlock level, refreshed daily. Passive: minor temp HP buffer.

Active: 1/day prevent a willing ally within 30 ft from falling unconscious for 1 round. Passive: +2 to stabilize checks.

21. Ring of Poison

Active: 1/day toxic strike (Fortitude or 1d6 Con damage). At 10th: 2/day and 1d8 Con. At 16th: immune to poison while attuned. Passive: +1 poison damage on attacks.

32. Ring of Whispering Lies

Active: 1/day force a creature to reroll a Sense Motive or Perception check and take the worse result. Passive: +2 to Bluff.

22. Ring of Resistance**33. Ring of Warped Time**

Active: resistance 10 to one energy type for 1 hour (1/day); at 10th resistance 20 and passive covers two types; at 16th immunity for duration. Passive: resistance 5 to one energy type.

Active: 1/day gain an extra swift action this round. Passive: +2 on initiative checks.

34. Ring of Umbral Arsenal

Grants the Dark Claim ability of the warlock.

Active: 1/day conjure a shadow weapon (+1 weapon of your choice for 1 minute/level). Passive: proficiency with one martial weapon while attuned.

24. Ring of Blood Price**35. Ring of Soul Ledger**

Active: next successful attack after taking damage deals +1d6 per 5 warlock levels. Passive: +1 damage on attacks while below half HP.

Active: when a cursed or hexed enemy dies within 30 ft, regain 1 expended class-resource point. Passive: +1 on saves against death effects.

25. Ring of Shadow Step**Ring List — Book 2**

Active: 1/day as a move action, teleport up to 30 ft between dim light or darkness. Passive: +5 competence on Stealth in dim light.

1. Ring of Marriage**23. Ring of Dark Claim****26. Ring of Bone Ward**

Active: DR 5/bludgeoning for 1 minute. Passive: DR 1/bludgeoning.

27. Ring of Hex Echo

Active: when a creature fails a save against a curse or hex, a second creature within 10 ft takes –2 on its next save. Passive: +1 DC of curse effects against shaken or frightened creatures.

28. Ring of Storm Tongue

Passive: no mechanical benefit. Bears narrative weight and cannot be replaced or suppressed by other bound rings. The warlock designates a specific physical ring during attunement. Active: none. Scaling: none.

2. Sigil Ring

Passive: the ring bears the warlock's unique sigil, serving as recognized mark of authorship and arcane identity. Valid for authentication, claiming ownership of created effects, and arcane identification. Active: as a swift action, imprint the sigil onto a surface, object, or construct within reach. The mark persists indefinitely. Scaling: none.

3. Ring of Keys**11. Ring of Mundane Form**

Passive: maintain a Keychain of Master linked to chambers within your Infernal Mansion. Keys equal your essence capacity. Active: as a move action, open a doorway to one linked chamber within reach. Only one doorway at a time.

Passive: no magical properties. Indistinguishable from a normal non-magical ring.

4. Ring of Angeloid

Passive: gain an Angeloid Companion using the

Angeloid progression table instead of the Djinn companion.

5. Ring of Trouble

Passive: gain a Panther Animal Companion using warlock level as effective druid level. Active: as a swift action, empower your panther for 1 round (+2 to attack rolls and AC; attacks count as magical).

6. Ring of Companion Eyes

Passive: as a move action, shift perception to a controlled companion (see/hear from its space; blind/deaf to your own; end as a free action). Active: as a swift action, establish split perception for 1 round—perceive both your senses and your companion's simultaneously without suffering blindness.

7. Ring of Familiar

Passive: gain a Familiar using warlock level as effective wizard level; if you already have a familiar, levels stack. Active: as a swift action, channel through your familiar for 1 round (deliver touch effects from its space; +2 on Perception and skill checks the familiar assists with).

12. Ring of Geomancy

Passive: access to the Geomancy sphere using warlock level as effective practitioner level; 1–2 base geomancy talents. Active — Ley Surge: as a swift action for 1 round, geomantic effects treated as empowered by a strong ley line (+1 or +2 to DCs or effectiveness).

13. Ring of Runes

Passive: access to the Rune Magic system; 1–2 basic rune talents. Active — Rapid Inscription: as a swift action, fast-deploy one rune or place/trigger more quickly than normal.

14. Ring of True Direction

Passive: always know true south and orientation; never suffer disorientation penalties. Active — Unerring Path: 1/day for 1 hour, cannot become lost by any means; always know the most direct route to a chosen destination on the same plane.

15. Ring of Wands

Passive: activate wands as if you were a caster of the appropriate class, using warlock level as CL. Active — Wand Surge: 1/day as a swift action, next wand activated this round functions at increased potency (+2 CL or +2 save DC).

16. Ring of Allegiance

Passive: attuned allies can recognize your Beacon when activated and determine your general direction and condition. Active: as a standard action, emit a Beacon; chosen allies become aware of your location and state. Does not compel or transport.

Passive: declare an Allegiance to a person, faction, ideal, or cause. Always aware of its general state; instinctively align with its interests; effects compelling you to act against it are resisted (GM adjudicated). Only one Allegiance at a time. Active — Oath Shift: as a swift action, change your Allegiance (1–3 times/day; carries narrative weight).

9. Ring of Telepathy**17. Ring of the Horde**

Passive: communicate telepathically with visible creatures within 30 ft (two-way, no shared language required, creatures may block). Active: as a swift action, deeper link for 1 minute—increased range, communicate with multiple creatures, share simple sensory impressions.

Passive: creatures that respect power or tribal hierarchy are less likely to challenge you without cause; aura of raw presence and battle-readiness. Active — Lok'tar Ogar: 1/day as a swift action, +2 to attack rolls or damage for 1 round.

8. Ring of Beacon**10. Ring of Tongues**

Passive: understand and speak any spoken language; others hear you in their own language. Does not affect written languages.

Infernal Chain Array (Ex)

At 2nd level, the warlock manifests a network of infernal chains bound to her fingers. Each chain terminates in a specialized focus known as a chain head—an infernal construct designed to channel a specific magical effect. The warlock may bind up to 10 chain heads into her chain array. Binding or replacing a chain head requires 1 hour of focus, typically during a long rest.

Active and Passive Chain Heads

An active chain head functions at full power. All other bound chain heads remain passive, providing weaker or limited versions of their effects. The warlock may switch between active and passive chain heads as a swift action. Only one chain head may be swapped per round until 12th level, at which point two may be switched as part of the same swift action.

5. Watcher

Active: always know direction and distance of last struck creature for 10 minutes. Passive: sense lasts 1 round.

6. Soul Leech

Active: on damage, gain temporary HP equal to Charisma modifier (once per round). Passive: gain 1 temporary HP.

7. Focus

Active: grants Martial Focus; if already focused, +2 on chain attack rolls. Passive: +2 on concentration checks and checks to regain Martial Focus.

8. Alloyed

Active: chain counts as two special materials chosen when bound. Passive: counts as one of the chosen materials.

Active**9. Poison**

1 Active: 1 on damage, target must save (Fortitude) or take 2 1d2 Con damage and become sickened 1 round. 2 -2 penalty on Fortitude saves 1 round. Passive: 3

10. Healing

3

Active: 4 chain may restore HP equal to the damage it would deal to a willing target. Passive: heals half. 5

11. Bleed

5

Active: attacks inflict 1d4 bleed. Passive: bleed occurs only on a critical hit.

Chain Head List**12. Anchor****1. Dowsing**

Active: attach to terrain, pull yourself up to 20 ft or prevent forced movement. Passive: +4 to resist bull rush, drag, or reposition.

Active: +10 on Perception and Survival to locate creatures within chain reach. Passive: +5 on those checks.

13. Piercing**2. Binding**

Active: ignore 5 points of DR. Passive: ignore 2 points.

Active: struck creature must save (Reflex) or become entangled for 1 round. Passive: -10 ft movement for 1 round.

14. Elemental**3. Curse****15. Dread**

Active: struck creature takes -2 on attack rolls and saves for 1 round. Passive: -1 on attack rolls for 1 round.

Active: struck creature must save (Will) or become shaken for 1 round. Passive: -2 penalty on fear saves 1 round.

4. Harpoon

Active: on hit, pull target 10 ft toward the warlock. Passive: pull 5 ft.

Active: choose fire, cold, electricity, or acid; chain deals +1d6 elemental damage. Passive: +1d4 elemental.

16. Exorcist (Ghost Touch)

Active: chain gains ghost touch and deals full damage to incorporeal creatures. Passive: can still strike incorporeal but deals half damage.

The blade does not merely strike—it imposes a condition of reality where that element is present.

17. Deep Crystal

On a hit, target takes 1 bleed damage (increases by +1 at 7th and every 6 levels). Multiple hits refresh duration.

Active: expend Martial Focus on striking to deal +2d6 psionic force bonus damage. Passive: +1 bonus damage on chain attacks.

18. Runed

Active: deliver rune or rune-like supernatural abilities through the chain. Passive: chain treated as magical, +1 on attack rolls.

19. Conduit

Active: deliver touch spells through the chain attack; if the attack hits, the spell effect applies to the struck creature. Passive: +2 on concentration checks when casting spells in melee.

20. Amber-Fused

Always active: add caster level as a bonus on attack rolls and damage rolls with the chain (cannot exceed character level). Does not require activation.

2. Bleed

The wound is not the problem. The continuation is.

3. Runed

On a hit, place, advance, or trigger one eligible rune effect on the target. The blade marks more than flesh—it establishes a sequence.

4. Ghost Strike

Attacks ignore incorporeal miss chance and deal full

damage to incorporeal creatures, as if possessing ghost touch. Nothing avoids a decision once it has been made.

5. Amber-Fused

Attacks use warlock class level in place of BAB and

Charisma modifier in place of Strength or Dexterity for

attack and damage rolls. The blade does not rely on the body. It answers to intent.

21. Holy

6. Poison

Active: +1d6 holy damage against undead, fiends, and evil subtype creatures; ignores their DR. Passive: chain counts as good-aligned for overcoming DR.

On a hit, target must save (Fortitude, DC 10 + 1/2 level + Charisma modifier) or become sickened for 1 round. Multiple hits refresh duration. The effect is not poison in the traditional sense—it is rejection.

7. Beacon

Blade Augments

Each infernal blade may be fitted with one blade

augment. Assigning or reassigning augments requires 10 minutes of focus, typically during daily preparation. When making an attack, the warlock chooses which blade she is using; that blade's augment applies. Augment effects trigger on a successful hit, last until the start of the warlock's next turn, and do not stack with themselves unless otherwise stated. Some augments are marked Reserve and function while the blade remains in the array undeployed. Blade augments do not enhance the weapon—they redefine how the warlock's will is expressed through it. Each one determines not only what happens on impact, but what is allowed to happen at all.

1. Elemental

+1 energy damage of a chosen type (fire, cold, electricity, or acid). Increases by +1 at 5th level and every 4 levels.

On a hit, designate the struck creature or location as your beacon. May be used as an origin or destination for any warp or teleportation effect granted by warlock abilities. The blade defines a point. The warlock decides what that point means.

8. Cascading

First time each round you hit with this blade, gain a +1 circumstance bonus on your next attack roll this turn. If that attack hits, the bonus increases to +2. The chain ends on a miss or at the end of your turn. Momentum is not gained—it is constructed.

9. Hexed

On a hit, target suffers a minor hex rider chosen when this augment is assigned (such as –1 penalty to a saving throw or a brief condition). Multiple hits refresh duration. The blade leaves behind more than damage—it leaves instruction.

10. Shadow

18. Banishing

On a hit, target gains the shaken or dazzled condition (chosen when assigned) for 1 round. Shaken is a mindaffecting fear effect.

On a hit against a summoned or extraplanar creature, the target takes –2 on saves against dismissal, banishment, and similar effects until the start of your next turn.

The strike carries implication. The mind follows.

11. Alloyed

Choose two special materials (such as adamantine and

cold iron). Attacks are treated as both materials for overcoming DR and hardness. The blade is not made—it is declared to be.

12. Vampiric

On a hit, gain temporary hit points equal to Charisma modifier (minimum 1). These last 1 minute and replace any previous total from this augment. What is taken is not returned.

13. Conduit

Not all presences are permitted to remain.

19. Revealing

On a hit, the target loses any concealment it possesses against your attacks until the start of your next turn. Does not affect total concealment from invisibility. Obscurity is conditional.

20. Anchoring

On a hit, the target takes –2 to CMD against bull rush, reposition, and trip attempts until the start of your next turn. Movement becomes negotiable.

On a hit, deliver one warlock class ability that requires a touch attack or targets a single creature (standard action or less) through the blade. The target takes blade damage and is subject to the delivered effect simultaneously.

21. Grounding

The blade becomes a medium. The effect follows.

Elevation is not immunity.

14. Marked	1
	+0
22. Focusing	3
On a hit, the target becomes marked until the start of your next turn. You gain a +1 insight bonus on attack rolls against a marked target.	2
On a hit, you may immediately attempt to regain martial focus as a free action. This may occur once per round.	+1
Recognition is sufficient.	What has been established can be undone.
Clarity is restored through action.	4
15. Exploding	3
23. Omen	+2
On a hit, the blade detonates in a 10-foot-radius burst.	6
Creatures other than the primary target take energy	4
damage equal to your Charisma modifier (Reflex half; DC 10 + 1/2 level + Cha). Energy type chosen when assigned.	+3
On a hit, the target becomes omen-marked until the start of your next turn. The next ally to hit the marked target gains a +1 morale bonus on that attack roll. The effect is consumed when triggered.	On a hit, immediately invest or divest 1 point of essence in a shaped veil, or treat the target as linked for one veil interaction this round.
The strike does not end at the point of contact.	7
16. Aegis (Reserve)	5
While this blade remains undeployed in your array, gain a +1 shield bonus to AC. Multiple Aegis blades stack up to a maximum equal to your Charisma modifier. Defense does not require action—only presence.	+3
17. Bane	8
Choose one creature type (and subtype) when	6
assigning. Attacks deal +2 damage against that type. The blade is given preference.	+4
On a hit, a flying target must succeed at a Reflex save (DC 10 + 1/2 level + Cha) or immediately descend 10 feet. This descent does not provoke AoOs or cause falling damage.	9
The future is shared.	6
24. Disarming	+4
On a hit, the target takes –2 to CMD against disarm attempts and –1 on attack rolls with manufactured weapons until the start of your next turn. Control extends beyond damage.	Systems are not separate—they are coordinated.
25. Warding (Reserve)	10
While undeployed, gain a +1 resistance bonus on saves against spells and spell-like abilities. Multiple Warding blades stack to a maximum of +3. The warlock is not unprotected—she is unyielding.	7
26. Spell-Rending	+5
Warlock Level	11
Puppet HD	8
Base Attack	+6
On a hit, gain a +2 bonus on any dispel check targeting an effect on that creature before the end of your turn.	12
2	9
	17

12

+9

29. Psychic Focus (Reserve/Strike)

18

13

+10

Reserve: +2 on concentration checks and checks to regain psychic focus. Strike: on a hit, treat yourself as having psychic focus for one ability before the start of your next turn.

19

14

+10

20

15

+11

27. Veil-Linked**28. Amped**

On a hit, the target becomes amped until the start of your next turn. The next sphere effect or class ability applied to that target gains one bonus (chosen when assigned): +1 save DC, +1 CL, or -1 spell point cost. The next action has already been prepared.

State is temporary. Control is not.

30. Phase-Lock

On a hit, the target cannot use teleportation, plane shift, extradimensional movement, or similar abilities until the start of your next turn. Escape requires permission.

Infernal Marionette Frame

At 1st level the warlock binds a puppet construct to her soul. The marionette can exist in two configurations:

Puppet Mode (separate platform) or Frame Mode

(worn as combat rig).

Basic Chassis

1

The puppet occupies its own square within 30 ft + 5 ft per 2 warlock levels. All attacks originate from the puppet. The warlock uses her actions to command it.

Frame Mode (Kugitaijutsu)

The warlock merges with the puppet frame. The puppet becomes a combat harness and weapon rig. Puppet limbs may become natural weapons; puppet HP becomes temporary shielding; certain modules grant reach, extra attacks, or special maneuvers.

Modification System**The marionette has 6 Active Modules and 5 Passive**

Modules. Modules can be swapped with 10 minutes of maintenance. Active modules are weapon systems. Passive modules improve the chassis.

Active Modules

Type: Construct (supernatural). Size: Medium. HP: half the warlock's HP. AC: 10 + 1/2 warlock level + Charisma modifier. Hardness: 2 at low levels, scaling to approximately 8 at high levels. Speed: 30 ft. Attack rolls use warlock BAB + Charisma. If destroyed, collapses and reforms after 1 minute.

Warlock Level**Puppet Mode****Puppet HD**

1

Base Attack

+0

1. Razor Limbs

Serrated infernal blade arms. Attacks deal slashing damage and gain a small bleed effect.

2. Grapple Clamps

Heavy clawed hands for capture. Gain a bonus on grapple checks and may initiate grapple after a hit.

Special**3. Chain Launcher****Puppet modification**

Fires infernal chains. On hit, target may be pulled 10 ft toward the puppet.

The puppet emits a demonic roar or aura that may shake enemies.

4. Scorpion Tail**17. Soul Harvester**

Segmented tail with reach attack that may deliver poison or curses.

When enemies die near the puppet, the warlock gains a small resource refund.

5. Soul Cannon**18. Reinforced Frame**

Chest-mounted infernal projector. Ranged attack dealing force or negative energy damage.

Increase puppet hardness and durability.

6. Hooked Talons

Reduces incoming physical damage.

Curved claws for climbing and tearing. Bonuses to climb checks and critical threat range.

20. Soul Barrier**19. Infernal Armor Plating****7. Bone Spear Launcher**

The puppet can absorb damage for the warlock once

per round.

Launches sharpened bone spikes. Ranged piercing attack with extended range.

21. Sensor Mask**8. Execution Hammer**

Heavy crushing arm. Extra damage against stunned, prone, or Claimed targets.

9. Infernal Drill

Spinning drill limb for piercing armor. Ignores a portion of enemy DR.

The warlock can see and hear through the puppet.

22. Whisper Engine

The puppet can relay sound and speech through infernal threads.

23. Mimic Frame

The puppet can disguise itself as an object or statue.

10. Spider Frame**24. Multi-Joint Limbs**

Additional mechanical limbs. May climb walls and ceilings at half speed.

The puppet gains increased reach and flexibility.

11. Shadow Step Core**Pact Marionette**

The puppet may teleport a short distance once per round.

The warlock may bind infernal threads to a willing

creature within close range. While the bond is active, the warlock may guide the creature's movements and attacks as if directing a puppet. The creature still uses its own stats but the warlock can assist with positioning and coordination.

12. Jet Thrusters

Infernal exhaust vents increase movement speed and allow short leaps.

Passive Modules**13. Stabilizer Gyros****Marionette Infernal Arts****Twin Marionettes (Su)**

The puppet automatically senses creatures marked by Dark Claim.

The warlock gains a second Infernal Marionette using

the same statistics, hit dice progression, AC calculation, hardness, and base abilities. Both are controlled by the warlock and must remain within normal puppet control range. The warlock may divide attacks between them. Each marionette may have its own installed modules.

15. Curse Injector**Self-Puppetry (Su)**

Attacks may deliver minor curse effects.

When the warlock is affected by stunned, paralyzed, or similar movement-impairing effects, infernal threads seize control of her body. While active, the warlock may

The puppet cannot be easily knocked prone or repositioned.

14. Claim Tracker**16. Fear Projector**

take one action each round—but only to escape the battlefield (move up to half speed, withdraw, or activate repositioning abilities). Cannot be used to attack, cast offensive spells, or otherwise continue participation in combat. Once she has successfully exited combat range, the ability ends and the original condition continues normally. If the warlock possesses a Guardian companion, that Guardian may activate this

Infernal Art on the warlock's behalf when she becomes incapacitated.

Dance of Ten Marionettes (Su) — Secret Art

Prerequisites: Infernal Marionette, Warlock level 15+. As a full-round action, the warlock divides her marionette into ten lesser puppets controlled by threads of hellfire, surrounding the battlefield. These puppets remain under the warlock's control for 1 round per warlock level.

Cross-System Compatibility**Rules**

removed from play, its assigned upgrades remain bound to that platform and return when the platform is restored.

Matrix Compatibility

A Matrix Platform is treated as a valid host for external

upgrade systems even if it would not normally qualify as a weapon, construct, companion, or magic item. The upgrade functions through the Matrix Platform using the warlock's statistics unless the upgrade specifies another value. This ability

grants compatibility only. It does not grant additional slots, increase capacity, or alter the normal limitations of any upgrade system.

Infernal Object Qualification (Su)

The warlock's infernal creations are neither ordinary

equipment nor independent creatures. For the purpose of abilities, subsystems, feats, templates, rituals, campaigns, or optional rules that modify, improve, level, awaken, evolve, empower, advance, or otherwise grant progression to items, the following class features are considered valid items: •

Infernal Blades (each blade is a separate qualified object)

Infernal Matrix (Su)

•

The warlock's infernal creations are built upon a

common metaphysical framework known as the Infernal Matrix. The following class features are Matrix Platforms:

Infernal Chain Array (the Array itself is one

qualified object; each Chain Head is an additional separate qualified object)

•

Infernal Marionette Frame (the Frame is one

qualified object; each installed module is not separately qualified unless explicitly stated)

•

Infernal Blades

•

Infernal Chain Array

•

Infernal Marionette Frame

Any archetype, alternate class feature, invocation, infernal art, or subsystem that explicitly replaces or modifies a Matrix Platform is also treated as a Matrix Platform for all purposes.

Whenever the warlock gains access to an external

upgrade system that normally attaches to weapons, equipment, constructs, companions, or similar entities—such as Materia, Spell Gems, Socketed Runes, Weapon Crystals, or other GM-approved systems—she may assign those upgrades to a Matrix Platform instead.

Each Matrix Platform maintains its own assigned

upgrades independently. Assigned upgrades affect only the platform to which they are attached unless the upgrade explicitly states otherwise. If a Matrix Platform is dismissed, destroyed, thrown, broken, or temporarily

Any archetype, alternate class feature, invocation, infernal art, or subsystem that explicitly replaces or modifies a listed feature—or that designates itself as a

Qualified Infernal Object—also benefits from this

ability.

Progression applied to one qualified object does not

automatically transfer to another. If a qualified object is dismissed, destroyed, thrown, broken, or temporarily removed from play, any progression applied to it remains associated with it and returns when the object is restored. This ability grants compatibility only. It does not grant item levels, Item Worlds, enhancement bonuses, awakening ranks, advancement points, experience, or any other progression system by itself.

Appendix: Infernal Objects and

Item World Entry — GM

Guidance

The following guidelines are provided for GMs

running campaigns that incorporate Item World progression systems. These are recommendations. The GM determines final classification.

Infernal Marionette Frame — Recommended Rank: Rare to Legendary The Frame is a construct. It has hit dice, hardness, a module architecture, and two operational modes. It should be treated accordingly. •

Recommended floor depth: 20–40 (scale with warlock level)

•

Recommended improvements: hit point pool increase, hardness increase, additional module slot, action economy improvement, Frame Mode natural weapon damage increase, reform time reduction

•

Module slots gained through Item World are

genuine additions. The normal module count is not a cap on advanced Frames.

•

If the Frame is destroyed mid-Item World, the run ends immediately. The Frame reforms on its normal schedule.

Infernal Blades — Recommended Rank:

Common

Each blade is a discrete weapon-class object. It is one of six. It is not unique. •

Recommended floor depth: 5–10

•

Recommended improvements: attack roll bonus, damage die increase, augment slot addition, elemental property, critical threat range

•

One blade may be advanced independently of

the others. Advanced blades are visually distinct if the warlock chooses.

•

If a blade is destroyed mid-Item World, the run ends. Progress is retained unless the GM rules otherwise.

A blade that has been through the Item World is still a blade. It is simply a blade that has been decided upon more thoroughly.

Chain Heads — Recommended Rank:

Common to Uncommon

Each Chain Head is a focused functional tool. Its advancement should reflect specialization, not expansion. •

Recommended floor depth: 5–15 (scale with

Chain Head complexity)

•

Recommended improvements: passive effect magnitude, active effect frequency, range increase, secondary condition added to active

•

Chain Heads may not gain effects outside

their established function. A Curse Chain Head becomes a better Curse Chain Head. It does not become a Soul Leech Chain Head.

•

The Array itself, if advanced separately, should yield improvements to global chain function: maximum active Chain Heads, swap action economy, reach.

The head knows what it does. Advancement makes it more certain.

The Frame is not simple enough to be finished quickly. That is appropriate. It is not a tool. It is a configured extension of the warlock's will.

General GM Notes

On object destruction during runs

The default assumption is that progress is retained on

the specific object. If the GM prefers stricter rules, progress loss on mid-run destruction is a valid house rule—but should be stated before a run begins.

On the Item World as narrative space

An Infernal Blade's Item World is not a dungeon inside

a sword. It is a compressed iteration of the warlock's own authority—a space where her will has been externalized and can be strengthened through conflict.

GMs are encouraged to populate these spaces with

thematically appropriate encounters rather than generic monsters.

On simultaneous advancement

The warlock may only be present in one Item World at

a time. She may send a proxy (Marionette, Prinny, or companion) into a lower-ranked object's Item World on her behalf, but the warlock herself must enter any Rare or Legendary object personally.

On Blades specifically

Six blades is a meaningful ceiling. GMs should consider whether they want to allow all six to be independently advanced or cap advancement at three. Fully advanced

six-blade arrays are a significant power investment and should feel like one.
