Night Monarch

This edition follows the revised master. The confirmed corrections in Integrated Revision govern brand identity and subsystem ownership, overriding earlier inspiration summaries. Current Edition Notes record subsequent author instructions and recovered source material.

Class Overview

Starting Age: Intuitive

Hit Die: d8

Skill Ranks Per Level: 6 + Int modifier

Class Skills: Acrobatics (Dex), Bluff (Cha), Climb (Str), Craft (Int), Diplomacy (Cha), Intimidate (Cha), Perception (Wis), Perform (Cha), Profession (Wis), Sense Motive (Wis), Spellcraft (Int), Use Magic Device (Cha)

Proficiencies: Simple weapons, light armor, and bucklers. If this is the character's first level in any class, they may select a martial tradition of their choice.

Casting: Mid-Caster. Uses Charisma as casting ability modifier. Gains 2 bonus talents and may select a casting tradition the first time they gain the casting class feature.

Spell Pool: Level + Charisma modifier (minimum 1). Replenishes after 8 hours of rest.

Practitioner/Operative Modifier: Charisma

Core Class Features

Blended Training

The Night Monarch gains a combat or magic talent every time she gains a class level, according to the class table. Night Monarchs use their Charisma modifier as their practitioner modifier and operative modifier.

Master of Night (Su)

The Night Monarch radiates an aura of dark authority. She gains a bonus on Intimidate checks equal to half her class level (minimum 1). Additionally, fiends, undead, and creatures with the evil subtype take a -2 penalty on saving throws against her abilities. At 10th level, this penalty increases to -4.

Dark Lore (Ex)

The Night Monarch's study of souls and fiendish power grants her insight into the creatures she hunts. She may make Knowledge checks untrained, and adds half her class level to all Knowledge (arcana), Knowledge (planes), and Knowledge (religion) checks. Additionally, when she successfully identifies a creature's abilities or weaknesses, she gains a +1 insight bonus on attack rolls against that creature for 24 hours.

Soul Arts (Su)

The Night Monarch learns how to harvest and control souls of others, gaining the Soul sphere as a bonus feat at 1st level. She uses her Hit Dice as her caster level for all Soul sphere talents.

Bloodline Brands (Su)

As a full-round action, the Night Monarch may attempt to absorb the soul essence of a willing or recently defeated creature, creating a Bloodline Brand. She may only attempt absorption within a number of rounds equal to her class level after the creature's defeat. To absorb a creature, the Night Monarch rolls percentile dice. The base absorption chance is 25%, modified as follows: • +5% per class level • -5% per Hit Die the creature possesses • +10% if the creature is willing If the roll succeeds, the Night Monarch gains a Bloodline Brand tied to that creature's essence, granting her access to that brand's talent list. She may store a number of Bloodline Brands equal to her Bloodline Brands column. If she is already at maximum brands, she must choose one to permanently overwrite. Switching her active brand costs a full-round action.

Succubus Companion

The Night Monarch starts the game with a special companion known as a Succubus at 1st level, bound to one of her Bloodline Brand slots. See the Succubus Companion section for full rules.

Magatama (Su)

At 2nd level, the Night Monarch may customize up to three magatama — sacred gems she spends 8 hours attuning through meditation, ritual, and combat practice. Each magatama represents a unique configuration of power she has drilled into her fighting style. The number of magatama she may have customized simultaneously increases to 4 at 8th level and 5 at 14th level. Each magatama may contain a number of sphere talents equal to the Talents per Magatama column on the Night Monarch table. A magatama must contain a base sphere before additional talents from that sphere may be added, unless the Night Monarch already possesses that base sphere through another source such as Blended Training, the Extra Combat Talent feat, or multiclassing. Talents granted by a magatama cannot be used to qualify for feats or meet prerequisites unless otherwise noted. Spheres and talents that grant skill retraining never do so when gained through a magatama. The Night Monarch may only benefit from one magatama at a time — this is her active magatama. She may switch her active magatama as a swift action. She may customize a new magatama or alter an existing one by spending 8 hours, choosing which talents to lose and which to replace them with.

Infernal Grace (Su)

At 2nd level, the Night Monarch adds her Charisma modifier as a bonus on all saving throws.

Uncanny Dodge (Ex)

At 4th level, the Night Monarch retains her Dexterity bonus to AC even when caught flat-footed or struck by an invisible attacker.

Improved Uncanny Dodge (Ex)

At 12th level, the Night Monarch can no longer be flanked, except by a rogue of at least 4 levels higher.

Archfiend Form (Su)

At 20th level, the Night Monarch permanently becomes an outsider. Her creature type changes to outsider (native) with the evil and extraplanar subtypes. She chooses one fiend subtype — devil (lawful), demon (chaotic), or daemon (neutral) — which cannot be changed. She gains the following permanent benefits: • Darkvision 60 ft (or existing darkvision increases by 30 ft) • Damage Reduction 10/good • Energy Resistance 10 to fire and one energy type appropriate to her subtype (cold for devil, electricity for demon, acid for daemon) • Immunity to poison and disease • No longer needs to eat, sleep, or breathe (may still rest to recover spell points) • Tongues (constant, self only) — communicate with any creature that has a language • Spell Resistance equal to 11 + Night Monarch level • Charisma increases by +4

Infernal Arts

As the Night Monarch's power grows she learns special techniques known as Infernal Arts to further her dark mastery. At 1st level and every 2 levels after that, the Night Monarch learns one Infernal Art from the following list. Unless otherwise noted, each Infernal Art may only be taken once.

Resonance (Su)

The Night Monarch may spend 1 spell point as a swift action to empower her active Succubus companion's supernatural abilities, granting a +2 bonus on attack rolls and damage rolls made with those abilities for 1 round.

Cross Training (Ex)

Through rigorous study or field practice, the Night Monarch has acquired the fundamental ability of another class. She may select one class other than her own to cross-train with. She gains one 1st-level class feature of her choice from the chosen class. She does not gain the chosen class's BAB, saving throw improvements, or spellcasting progression. This class cannot be changed once selected.

Advanced Training (Ex)

Having honed her cross-training further, the Night Monarch now gains class features from the cross-trained class as if she were a number of levels equal to her total character level, but only up to a maximum of 5th level in that class. Prerequisite: Cross Training.

Friends on the Other Side (Su)

The Night Monarch learns to contact a special outsider merchant, allowing her to buy and sell anywhere by spending a full-round action.

Champion Feat (Ex)

The Night Monarch gains any one combat feat as a bonus feat, ignoring prerequisites.

Kindled Essence (Su)

The Night Monarch's studies allow her to kindle her akashic spark, granting her an essence pool equal to her class level plus her Charisma modifier.

Akashic Understanding (Su)

The Night Monarch's studies of akashic energies allow her to bind veils into her chakras, unlocking them in the following order: hands, head, feet, headband, shoulder, wrist, belt, neck. The Night Monarch's veil list contains all veils from the Promethean and Vizier lists, along with the following unique veils: Oni Sword Master's Pauldron, Reaper's Glaive, Night Monarch Warblade.

Energy Nexus (Su)

The Night Monarch learns to convert multiple energy types — spell pool, ki, and essence — between each other. As a full-round action, she can convert up to her Charisma modifier in points of one energy type she controls to another energy type she controls.

Negotiation, My Dear (Ex)

The Night Monarch knows the importance of hazard pay, compensation, and negotiations. She adds her class level to any Diplomacy checks made to earn monetary rewards.

Monster Collector (Su)

The Night Monarch becomes adept at absorbing unusual creatures. When using Bloodline Brands, she can now absorb the essence of monstrous creatures (magical beasts, dragons, etc.), provided they possess supernatural abilities. The number of brands she can store increases by 1.

Rajah Heraldry (Ex)

The Night Monarch can create a magical crest that inspires awe in allies and fear in enemies. As a standard action, she projects an aura (30-ft. radius) for a number of rounds equal to her Charisma modifier. Allies gain a +1 morale bonus to attack rolls and saving throws. Enemies suffer a -1 penalty to these rolls. At 10th level, these bonuses and penalties increase to +2/-2.

Merge Brand (Su)

The Night Monarch can merge two Bloodline Brands into one, combining their abilities. The merged brand counts as a single brand but retains both sets of abilities. Switching to or from a merged brand still requires the standard action cost. At 12th level, the Night Monarch may merge up to three brands.

Amped Brands (Su)

The Night Monarch may augment her brands with Mana Sphere amp talents. When using abilities gained from Bloodline Brands, she may expend 1 spell point to apply a single Mana amp talent she knows to the ability.

True Pure Body (Ex)

The Night Monarch perfects her physical form. She gains the full hit points from her Hit Dice, instead of rolling or taking the average. This applies retroactively to all previous levels.

Leadership (Ex)

The Night Monarch gains the Leadership feat, using her Charisma modifier as the primary determining factor for her cohort and followers.

Crimson Elixir (Su)

The Night Monarch has a number of uses of Crimson Elixir per day equal to her Charisma modifier. Each use produces an elixir that, when consumed, heals the target as cure light wounds. Alternatively, the elixir grants the consuming creature the vampire template. Crimson Elixir has no blood-point cost.

Creation and handling: Creating an elixir is a standard action. The vial persists for 1 hour before losing potency. Drinking it is a standard action. These timings are preserved from the revised master; its former healing formula and blood-point cost are superseded by the author's correction.

Unresolved details: The healing caster level and exact vampire-template source and eligibility still require definition. The older Fortitude-save, delayed-transformation, NPC-control and sickened clauses are not included in the newly confirmed alternative.

Soul Sight (Su)

The Night Monarch's dark lore sharpens into supernatural perception. She gains blindsense 30 ft against any creature whose Bloodline Brand she possesses. Additionally she may spend 1 spell point to gain true seeing for 1 round per class level once per day.

Infernal Stride (Su)

The Night Monarch's fiendish nature bleeds into her movement. She gains a +10 bonus to her base land speed.

Magatama Mastery (Ex)

The Night Monarch's attunement to her magatama deepens. She may switch her active magatama as a free action instead of a swift action. Additionally once per day she may benefit from two active magatama simultaneously for a number of rounds equal to her Charisma modifier. Prerequisite: Must possess at least 3 customized magatama.

Succubus Companion

The Night Monarch starts the game with a special companion known as a Succubus at 1st level, bound to one of her Bloodline Brand slots.

Brand Bounty (Su)

The Succubus companion may be stored within one of her master's Bloodline Brand slots. While stored, the Night Monarch gains access to all of her Succubus companion's currently known talents as if they were her own. The Succubus companion continues to gain experience and talents normally while stored. Retrieving or storing the Succubus companion requires a full-round action.

Spiritual Development (Ex)

The Succubus companion's physical form grows stronger as her bond with her master deepens. She gains a bonus to both Strength and Dexterity equal to the Str/Dex Boost column on her progression table.

Profane Grace (Su)

At 3rd level, the Succubus companion adds her Charisma modifier as a bonus on all saving throws.

Alertness (Ex)

While the Succubus companion is within reach, her master gains the Alertness feat, receiving a +2 bonus on Perception and Sense Motive checks. If the master already has Alertness, these bonuses increase to +4.

Magi-Change

The Succubus companion can transform herself into weapon or armor forms for her master. Unless noted, all Magi-Change transformations last a number of rounds equal to the Succubus's Hit Dice or until she reverts as a free action.

Succubus Talent List

- 1. Hex (Su):** The Succubus gains the ability to use witch hexes as if she were a witch of half her Hit Dice. She selects one hex upon gaining this talent and may use it a number of times per day equal to 3 + her Charisma modifier.
- 2. Eyecandy (Ex):** The Succubus gains a +2 inherent bonus to Charisma. This bonus increases to +4 at 10th level.
- 3. Initiate Magic (Sp):** The Succubus gains detect good, charm person, and suggestion as spell-like abilities, each usable a number of times per day equal to 3 + her Charisma modifier.
- 4. Magi-Change: Succubus Arms (Su):** As a full-round action, transforms into a melee or ranged weapon. Deals base damage appropriate to the weapon type. Enhancement bonus equal to half Hit Dice (min +1, max +5). Deals damage as evil-aligned. Fast Magi-Change reduces this to standard action; Lightning Magi-Change reduces to swift.
- 5. Magi-Change: Armor of Lust (Su):** As a full-round action, transforms into light, medium, or heavy armor. Enhancement bonus to AC equal to half Hit Dice (min +1, max +5). Grants fire resistance 10 and +2 bonus to saves vs. mind-affecting effects.
- 6. Fast Magi-Change (Su):** Activating Magi-Change abilities now requires only a standard action.
- 7. Lightning Magi-Change (Su):** Activating Magi-Change abilities now requires only a swift action. Prerequisite: Fast Magi-Change.
- 8. Slotted Magi-Change (Su):** Magi-Change forms gain slots the master may use to apply spheres or

talents related to the transformed form for the duration.

9. Sisterhood of the Master (Ex): While in the presence of another female bonded companion, the Succubus gains a +2 morale bonus to all saves and increases her effective Hit Dice by 2 for ability scaling.

10. Companion of the Lonely (Ex): Gains the Vigilante's Social Talent: Loyal Aid. +4 bonus on Diplomacy checks to gather information; may deliver messages with uncanny speed.

11. Soul Whip (Ex): Creates a melee force whip (1d8 medium / 1d6 small). Enhancement bonus equal to half Hit Dice. Deals force damage and can be used for disarm and trip attempts.

12. Heart Cannon (Su): As a standard action, fires a bolt of energy within 30 feet. Ranged touch attack dealing 1d6 per 2 Hit Dice (min 1d6). Damage is evil-aligned.

13. Bat Swarm (Su): As a standard action, targets a 10-foot radius within 30 feet. Deals 1d6 per 2 Hit Dice (Reflex half). Struck enemies suffer -2 AC until the start of her next turn.

14. Cultivated Power (Ex): May shift ability score increases to Wisdom or Charisma instead of Strength or Dexterity.

15. Channel Devotion (Su): Gains channel energy usable 3 + Charisma modifier times per day. Heals living or harms undead in a 30-ft radius for 1d6 per 2 Hit Dice.

16. Channel Adoration (Su): Channel energy also grants affected allies a +1 morale bonus to attack rolls and saves for 1 minute.

17. Demon of Multiple Worlds (Ex): May select up to three supernatural or spell-like abilities thematically appropriate to the campaign world, each usable once per day.

18. Soul Eater (Su): As a standard action, devours the soul of a creature that died within the last minute. Grants temporary HP equal to the creature's Hit Dice and +1 to attack rolls for 1 minute.

19. Extra Form (Su): Gains an additional Magi-Change form (weapon or armor), usable independently of existing forms.

20. Dark Mistress (Ex): Gains telepathic communication with her master at all times, regardless of distance.

21. Demonic Bloodline (Su): Gains DR 5/cold iron or good, immunity to poison, fire resistance 10. At 15th level, DR improves to 10/cold iron or good, fire resistance increases to 20, and she becomes immune to charm effects.

Light Spear (Su): As a standard action, hurls a spear of condensed radiant energy at a target within 60 feet. Ranged touch attack dealing 1d8 radiant damage per two class levels (maximum 10d8). Named in honor of Raynartte.

Channel Pool (Su): Gains channel energy as a cleric of her class level. Usable 3 + Charisma modifier times per day, healing living or harming undead in a 30-ft radius for 1d6 per two class levels.

Awareness (Ex): While this Bloodline Brand is active, the Night Monarch retains her Succubus companion's Alertness bonus regardless of proximity (+2 Perception and Sense Motive; +4 if she already has Alertness).

True Speech (Ex): The Night Monarch gains the ability to speak and understand all languages as per tongues. This effect is constant and requires no concentration.

Weapon Forms: Staff, Scythe, Sword, Gun, Gauntlet, Spear

Bloodline Brands

Bloodline Brands are supernatural marks tied to the Night Monarch's soul. As a full-round action, the Night Monarch can attempt to absorb willing or recently defeated creatures' life essence to create a Bloodline Brand, gaining access to their abilities as supernatural powers. See Core Class Features for absorption rules. The complete brand list contains 28 brands. Each brand uses either the standard Succubus Companion progression table or the Path of War Martial progression table (noted per brand).

Used by: Asura, Jaguar Sun, Rakshasa, Jiangshi

Lamia

Inspired by classic lamia mythology and Cassiopeia.

22. Petrifying Gaze (Su): As a standard action, target one creature within 30 feet. Fort save (DC 10 + half level + Cha) or be slowed 1 round/level. At 10th level, failed save results in petrification instead.

23. Poison Spray (Su): Ranged attack within 30 ft. Fort save or take 1d4 Con damage, repeating each round for 6 rounds.

24. Magi-Change (Su): Standard weapon transformation form.

25. Magi-Change Armor (Su): Standard armor transformation form.

26. Fast Magi-Change (Su): As companion talent.

27. Lightning Magi-Change (Su): As companion talent.

28. Slotted Magi-Change (Su): As companion talent.

29. Skill Granter (Ex): Adds class level as a bonus on all Perform (Dance) checks.

30. Snake Bolt (Su): Ranged touch attack within 60 ft, dealing 1d6 poison damage per two class levels (max 10d6).

31. Hypnotic Gaze (Su): Gains the Mesmerist's Hypnotic Stare, imposing -2 on Will saves against her abilities on one target within 30 ft as a swift action.

32. Eyecandy (Ex): As companion talent.

33. Initiate Magic (Sp): As companion talent.

34. Constrict (Ex): Whenever she successfully grapples, deals 1d8 + Cha modifier bludgeoning damage automatically each round the grapple is maintained.

35. Rattlesnake (Ex): As a swift action, all enemies within 30 ft make Will save or be shaken for 1d4 rounds. Already shaken creatures become frightened.

36. Grace (Ex): Adds Charisma to AC as dodge bonus.

37. Cultivation (Ex): Flexible ability score improvements.

38. Crest (Ex): +2 bonus on Bluff and Intimidate (+4 at 10th level).

Undying Rage (Su)

Once/day, when reduced below 0 HP, continue fighting for 1 round before falling unconscious.

Crown of Ashes (Su)

While in armor Magi-Change form, you radiate a 10-ft aura that deals 1 damage/HD as negative energy to living creatures at the start of your turn.

Jaguar Sun

Theme: Devouring power of the Jaguar of the Sun — blood, sacrifice, and endless war. Uses Martial Brand (Path of War) progression table. Favored Disciplines: Obsidian Dawn, Blood Raven, Crimson Fang. Sphere Package: Destruction, Blood, Fate. Magi-Change Forms: Heart-Ripper Claws (dual jaguar talons, bleed on crits, discipline weapons) / Sun-Pelt (jaguar hide armor, fire resistance, AC, radiant heat when struck).

Talent text below is recovered from the earlier supplied PDF. The integrated revision governs identity and progression; incomplete source entries remain unresolved.

Blood Feast (Ex)

When you reduce a foe to 0 HP, regain 1 maneuver.

Heart-Ripper (Su)

Once per encounter, on a crit, you may tear out the foe's essence: heal 1L HP and gain +2 attack for 1 round.

Sacrificial Surge (Ex)

You may deal 1d6 damage to yourself as a swift action to recover 1 expended maneuver.

Cycle of Blood (Su)

Killing an enemy restores 1 spell point or 1 essence.

Jaguar Pounce (Ex)

Gain +10 ft movement and +2 to attack/damage when charging a foe at half HP or lower.

Bleed & Predation

Crimson Fangs (Ex)

Your natural or brand claws inflict bleed 1d4; stacks on multiple hits.

Predator's Rend (Ex)

If both claws hit, deal +1d6 damage and force Fort save or staggered 1 round.

Blood in the Water (Ex)

+2 attack vs. bleeding foes; at 12 HD, becomes +4.

Sanguine Recovery (Su)

Whenever you deal bleed damage, heal 1 HP per round it ticks.

Jaguar Mask (Su)

Gain a glowing jaguar visage; +2 Intimidate, +2 vs fear.

Sun Power

Sunflare Strike (Su)

Once per encounter, add +1d6 fire/positive energy per 3 IL to a strike.

Solar Roar (Su)

As a swift action, roar in a 20-ft burst; enemies must save or be dazzled/blinded 1 rd.

Radiant Predator (Su)

While in sunlight, gain +2 AC and +2 to saves vs. necrotic/negative energy.

Day's Fury (Su)

Once/day, enter a fury for 1 min: +2 Str, +2 Con, +2 Will; costs 1 spell point or essence to activate.

Sun's Judgment (Su)

Enemies reduced to 0 HP by you burn to ash; prevents raise dead unless Miracle/Wish.

Sacrificial Magic

Bloodfire (Su)

Spend 1 spell point when initiating a strike → add +1d6 fire/negative energy damage per 4 IL.

Sanguine Ward (Su)

Sacrifice 5 HP as a swift action → gain +2 AC until your next turn.

Obsidian Teeth (Ex)

Your claws count as adamantite for DR/hardness.

Flesh Offering (Su)

When you damage yourself for an ability, gain +2 morale bonus to attack rolls for 1 round.

Jaguar Eclipse (Su)

Once/day, create a 20-ft darkness zone for 1 round/IL; only you see through it.

Totemic & Mythic

Totem Sun (Su)

Gain +2 Perform (chant/dance); when you succeed, allies gain +2 vs. fear for 1 round.

Skull Throne (Su)

Standing on a corpse square grants you +2 damage until you move.

Obsidian Fang Ritual (Su)

Once/day, before combat, ritually scar yourself; for that fight, gain +2 natural armor and +2 damage, but take -2 Fort saves.

Sun Devourer (Su)

Capstone talent — once/day, when you slay a foe with a strike, you may unleash a solar nova: 30-ft burst, 1d6 fire/positive energy per 2 IL, enemies Reflex half.

Rakshasa

Source classification conflict: The recovered page calls this a Normal Brand but supplies maneuver progression. The integrated revised master explicitly selects Martial Brand progression; that later decision governs this edition. Both source statements are recorded in the change ledger.

Uses Martial Brand (Path of War) progression table. Theme: Illusory shapeshifting predator with tiger claws and infernal magic.

Talent text below is recovered from the earlier supplied PDF. The integrated revision governs identity and progression; incomplete source entries remain unresolved.

Tiger's Claws (Ex)

Gain two claw attacks (1d6) as primary natural weapons.

Predator's Pounce (Ex)

You may make a full attack at the end of a charge when using claws.

Bloodied Strike (Ex)

When you deal claw damage, target bleeds 1d4/round (stacking).

Savage Rend (Ex)

If both claws hit the same foe, deal +1d6 damage and force a trip attempt.

Crimson Fangs (Su)

Your claws count as magical and evil for DR; at 10th level, also lawful.

Illusory Double (Su)

As a swift action, create 1 mirror image; +1 image at 6th and every 4 levels.

False Face (Su)

You can disguise self at will; at 10th level, this fools true seeing once/day.

Shifting Guise (Su)

As a move action, assume the form of any humanoid you've seen (alter *self*).

Shadow Stride (Su)

Teleport 10 ft as a swift action, usable a number of times/day equal to Cha mod.

Phantasmal Terror (Su)

Once/day per 4 HD, cast scare; at 12th HD, this becomes fear.

Rakshasa's Curse (Su)

Once/day, force a foe you hit to roll attacks/saves twice and take the worse for 1 round.

Hex of Weakness (Su)

As a standard action, target creature takes -2 Str for 1 min (Will negates).

Hex of Confusion (Su)

As a standard action, target must save or be confused for 1 round.

Charm Predator (Su)

Gain charm person as an SLA, usable 3 + Cha/day.

Suggestion (Sp)

Gain suggestion 1/day per 5 HD.

Energy Fangs (Su)

Your claws deal +1d6 fire, cold, or electricity (chosen daily).

Fiend's Resilience (Su)

Gain DR 2/good or silver; improves by 2 at 8th, 14th, 20th.

Spell Resistance (Su)

Gain SR equal to 10 + HD; can suppress as a free action.

Mind Shield (Su)

+2 vs. mind-affecting; at 10th level, immune to detect thoughts.

Tiger's Roar (Su)

Once/day per 5 HD, roar in a 30-ft cone; foes save or be shaken 1d4 rounds.

Master of Masks (Su)

May emulate any voice and mannerisms perfectly. Bluff checks gain +4.

Deceptive Step (Ex)

Whenever you feint in combat, gain +2 AC until your next turn.

Spell-Thief's Touch (Su)

Once/day per 5 HD, when striking with a claw, you may dispel one active effect (*dispel magic*, CL = HD).

Twilight Hunter (Ex)

Gain low-light vision and darkvision 60 ft; if you already have darkvision, extend it by 30 ft.

Ninefold Guile (Su)

Once/day, reroll a failed save vs. divination, illusion, or enchantment. Must take the second result.

Mummy Lord

Inspired by Menace from Queen's Blade with Astarte elements. The Scarf is her core weapon.

Scarf (Ex): Magical animated scarf as core weapon. Reach weapon dealing 1d6 + Cha mod bludgeoning damage with 10-ft reach. Enhancement bonus equal to half class level (min +1, max +5). Counts as magic for DR.

Master's Mandate (Ex): Gains the Rajah's Royal Mandate class feature using class level as Rajah level. Issues mandates to allies within 30 ft as a swift action.

Scarf Grapple (Ex): May grapple targets within 10 ft without provoking AoO. Uses Cha modifier in place of Str for all scarf grapple checks.

Scarf Blade (Su): As a swift action, hardens scarf into a razor edge. Until start of next turn, scarf deals slashing damage and gains +2 attack rolls. At 10th level: +4.

Scarf Slam (Ex): As a standard action, slams a target within 10 ft for 2d6 + Cha mod bludgeoning damage. Fort save or knocked prone.

Imbue Scarf (Su): As a swift action, channels dark energy into scarf. Until start of next turn, scarf deals +1d6 negative energy and struck creatures make Fort save or be sickened 1 round.

Tengu's Expertise (Ex): By spending 1 hour training with any weapon she is not proficient with, gains full proficiency with that weapon permanently. May be used any number of times.

Unison Device

Reinforce, Eins, Zwei and Agito anchor one customizable Unison system. Raising Heart is not an anchor. This Brand does not grant a second unconditional level-1 companion.

Recovered owning source — adapter unfinished. The complete donor text follows, retaining "warlock" terminology and its original acquisition sentence as source evidence. That sentence does not grant a Night Monarch class feature. Night Monarch acquisition, host/statistic mappings and the unresolved interfaces below must be settled before this adapter is presented as finished.

Unison Device (Su)

At 1st level the warlock is partnered with a Unison Device, a tiny intelligent magical construct or spirit that acts as both assistant and amplifier of the warlock's power.

The device typically appears as a pixie-sized entity, floating object, or small spirit avatar. It possesses its own personality and may communicate verbally or telepathically with its master.

The Unison Device functions as a companion using the progression shown on the Unison Device table.

The device has the following base traits:

- Size: Tiny
- Type: Construct or Outsider (spirit)
- Intelligence: 10
- Languages: understands its master
- Speed: fly 30 ft (perfect)

The device normally exists in Standby Mode, but may merge with its master using Unison Mode.

Standby Mode

While in standby, the Unison Device acts independently and occupies its own space.

In this state it provides passive assistance to the warlock and grants the following benefits:

- Alertness feat while within 30 ft
- may communicate with the warlock at any distance on the same plane
- may deliver touch spells for the warlock

The device is not primarily a combatant and rarely makes attacks.

Unison Mode

As a standard action the warlock may merge with their Unison Device, entering Unison Mode.

While merged:

- the device occupies the warlock's space
- the warlock gains the Strength/Dexterity bonus listed on the table
- the warlock gains access to Unison talents that function only during Unison Mode

Unison Mode lasts a number of rounds equal to the warlock's caster level.

Ending Unison Mode is a free action.

If the warlock becomes unconscious the Unison immediately ends.

Barrier System

When entering Unison Mode the device generates a magical barrier protecting the warlock.

Barrier Strength =

warlock level × 2 + Charisma modifier

Barrier strength functions as temporary hit points.

Damage is deducted from the barrier before affecting the warlock.

When the barrier reaches 0 it collapses.

Barrier strength is restored when Unison Mode ends.

Unison Bounty (Su)

While in Unison Mode, the warlock gains the benefits of all Unison talents possessed by the Unison Device. If a talent would normally require an action from the device, the warlock may instead perform that action.

Talents that modify the barrier, synchronization, or spellcasting apply directly to the warlock while merged.

Once Unison Mode ends, the device regains control of its talents.

Unison talents 17 done 11 to go

Lightning Unison

"Synchronization becomes instantaneous, body and spirit moving as one."

If the warlock possesses Fast Unison, activating Unison Mode becomes a free action instead of a swift action.

This ability may only be used once per round.

Combat Assist

"The device predicts movement and corrects its partner's aim."

While within 30 ft of the warlock, the device may Aid Another as a swift action.

When used during Unison Mode, the warlock gains a +2 competence bonus on attack rolls and combat maneuver checks for 1 round.

Config Expertise

"The device constantly recalibrates magical and tactical parameters."

The warlock gains a +2 competence bonus on initiative and concentration checks.

While in Unison Mode, this bonus increases to +4.

Greater Barrier

"The defensive field strengthens into layered protection."

The maximum strength of the Unison Barrier increases by an amount equal to the warlock's Charisma modifier + device level.

Lingering Barrier

"The barrier remains active even as its energy fluctuates."

When the Unison Barrier is reduced to 0 hit points, it does not immediately collapse.

Instead, it remains active until the end of the current round.

Reinforce Barrier

"The device channels additional energy to repair the defensive field."

While in Unison Mode, the warlock may spend 1 spell point as a swift action to restore barrier strength equal to 1d6 per two caster levels (maximum 10d6).

Barrier strength cannot exceed its normal maximum.

Unison Barrier

"Synchronization manifests as a protective field of magical force."

When Unison Mode begins, the warlock gains temporary hit points equal to twice the warlock's level + Charisma modifier.

These temporary hit points function as the Unison Barrier.

Master's Spells

"The device records and preserves magical formulas for its partner."

The Unison Device may store a number of spells equal to the warlock's Charisma modifier.

The warlock may cast these stored spells without preparing them, though they still expend normal spell slots or spell points.

Crest of Ars Magus

"The device channels spellcasting power independently."

While in Standby Mode, the Unison Device may cast one stored spell per round as a standard action, using the warlock's caster level and spellcasting ability.

Steal Linker Core

"The device siphons magical power from defeated foes."

When a creature within 30 ft is reduced to 0 hit points, the warlock may gain 1 temporary spell point.

Temporary spell points gained this way last 1 minute.

Linker Core Storage

"The device stabilizes and preserves magical energy."

Temporary spell points gained from Steal Linker Core last 10 minutes instead of 1 minute.

The warlock may store a number of temporary spell points equal to the device's level.

Translator

"The device interprets languages and magical communication."

The warlock gains the effects of tongues while the Unison Device is within 30 ft.

Companion for the Lonely

"The bond between master and device grows into true companionship."

The Unison Device gains a +2 bonus on Will saves and immunity to fear effects.

While in Unison Mode, the warlock gains the same benefits.

Puppet Mode

Unison Talent

If the warlock becomes unconscious, stunned, or otherwise unable to act while the Unison Device is present, the device may immediately assume control of the warlock's body as an immediate action.

While Puppet Mode is active:

- the warlock is treated as conscious but under the device's control
- the device uses its own Intelligence, Wisdom, and Charisma
- the warlock's physical ability scores remain unchanged
- the device may move the body and perform actions normally available to the warlock

Puppet Mode lasts for a number of rounds equal to the device's level or until the warlock regains consciousness.

When Puppet Mode ends, the warlock becomes unconscious again if they have not recovered.

Special:

If Unison Mode is active when the warlock is incapacitated, Puppet Mode automatically activates without consuming an action.

Wolkenritter Covenant

"The device awakens the ancient knight spirits bound within its core."

The Unison Device gains the Leadership feat, using the device's level as its character level and the warlock's Charisma modifier when determining its Leadership score.

Instead of normal followers, this ability grants four elite knight companions known as the Wolkenritter. These knights are loyal retainers permanently bound to the device.

The Wolkenritter function as cohort-level companions and are always considered devoted allies of both the warlock and the Unison Device.

The exact form and abilities of each knight are determined by the GM, though they typically represent different combat roles such as:

- armored vanguard
- weapon master
- guardian beast
- support mage

While the warlock is in Unison Mode, the Wolkenritter gain a +2 morale bonus on attack rolls, saving throws, and skill checks while within 30 ft of the warlock.

If a Wolkenritter is slain, a replacement cannot be gained for one month.

Alternate Unison Target

The Unison Device normally merges with its master when activating Unison Mode.

If the device possesses the Wolkenritter Covenant talent, it may instead merge with one of the Wolkenritter within 30 ft.

When merging with a Wolkenritter:

- that knight gains the benefits of Unison Bounty
- the warlock does not gain Unison benefits while the device is merged with a knight
- the device occupies the knight's space and cannot be targeted separately

Ending the Unison is a free action, after which the device reappears adjacent to its host.

Tactical Scanner

"The device constantly analyzes the battlefield."

The warlock gains a +2 bonus on Perception and Sense Motive checks.

While in Unison Mode, the warlock also gains +2 to initiative.

Arcane Diagnostics

"The device monitors magical fluctuations and system integrity."

The warlock gains detect magic at will while the device is within 30 ft.

Target Prediction

"The device calculates enemy movement before it happens."

Once per round, the warlock may gain a +2 insight bonus on an attack roll after seeing the result but before the outcome is declared.

Overclock Protocol

"The device briefly pushes the system beyond safe limits."

While in Unison Mode, the warlock gains +10 ft movement speed and +1 to attack rolls for 1 round.

This ability may be used once per encounter.

Guardian Protocol

"The device instinctively shields its master."

If the warlock would take damage while the device is within 10 ft, the device may reduce the damage by an amount equal to the device's level.

Emergency Unison

"When danger strikes, synchronization occurs instantly."

If the warlock is surprised or caught flat-footed, the device may enter Unison Mode as an immediate action.

Link Stabilization

"The bond between master and device becomes harder to break."

The warlock gains a +4 bonus on concentration checks while the device is within 30 ft.

Device Autonomy

"The device operates independently when necessary."

While in Standby Mode, the device may take move actions and use its talents without requiring commands from the warlock.

Spectral Armament

"The device may project weapons of magical force."

While in Standby Mode, the device may make a single ranged attack using the warlock's caster level as BAB.

Adaptive Barrier

"The defensive field adjusts to incoming threats."

When the Unison Barrier absorbs damage, the warlock gains energy resistance 5 against that damage type for 1 round.

Synchronization Surge

"The device channels additional power during Unison."

While in Unison Mode, the warlock gains +1 caster level.

Remote Unison

"The device may synchronize from a distance."

The Unison Device may enter Unison Mode with a valid host within 60 ft instead of needing to be adjacent.

Echo Memory

"The device records fragments of past battles."

Once per day, the warlock may reroll a failed attack roll, saving throw, or skill check.

Unison Completion Ledger

The source repeats Barrier System as Unison Barrier; their same-value temporary hit points are not declared additive. Fast Unison has no recovered definition even though Lightning Unison references it. Unison Boost, Ether Development and Armor appear in the table without completed definitions. Stored-spell capacity, spell-slot/spell-point compatibility, ability DCs, barrier reset timing and Guardian Protocol frequency remain unresolved. Puppet Mode's automatic activation must be reconciled with Unison ending on unconsciousness. Spectral Armament lacks damage and range. Wolkenritter cohort statistics and host mappings remain GM-dependent. The historical "17 done 11 to go" label is retained as source evidence, not a validated catalogue count.

Integrated Revision

Integrated Class and Bloodline Brand Revision

Revision Status

This section is part of the revised master. It preserves the complete supplied class document and records the confirmed corrections governing Brand identity, subsystem ownership, and future mechanical completion. Source limitation: the supplied Night Monarch PDF itself replaces the full Asura, Jaguar Sun, Rakshasa, and Unison Device talent text with references to an unavailable original document. Those missing rules are not invented here.

General Rules Corrections

Reference anchors

Named characters guide concept, silhouette, fantasy, or selected mechanics. They are anchors, not homage targets: their personalities, biographies, and complete movesets are not automatically imported.

Standard and Martial Brands

Oni remains on the older standard Brand chassis. Jiangshi, Asura, Jaguar Sun, and Rakshasa use the later Martial Brand (Path of War) progression.

Oni Magic

The Oni Brand does not automatically grant the Oni Sphere. A character must acquire Oni Magic through the general Brand rules to gain that sphere.

Controlled randomness

Harlequin randomness is controlled chaos. It may create tactical volatility and comedy, but should not casually kill the Night Monarch or invalidate the character.

Integrated Brand Corrections

Lamia

Classic lamia mythology with Cassiopeia as a conceptual anchor only.

Felyn

Disgaea Felyn and Felicia remain conceptual/mechanical anchors rather than personalities to reproduce.

Dragon

Natsu Dragneel is the primary anchor, with supporting Shield Hero dragon influence. The primary energy is fixed; Second Breath adds a second element, echoing Natsu acquiring lightning. Dragon Shot and Drake Blow are mechanical donors from High School DxD.

Succubus

A generic succubus, not a specific referenced character.

Angeloid

A general mechanical angel and weapons platform. Ikaros anchors the concept only.

Banshee

A dark windrunner/banshee archer. Sylvanas anchors the combat concept, not personality or biography.

Jiangshi

Hsien-Ko is the controlling anchor. The Brand uses Martial progression; Unquiet Grave is a core favored discipline, with additional disciplines supporting oversized weapons, mobility, and chi techniques.

Kitsune

Tama no Mai and Kiriko supply recognizable kitsune ideas and mechanics without either controlling the full identity.

Oni

A brutal oni bruiser on the standard Brand chassis. Oni Magic separately opens the Oni Sphere; the Brand is not retroactively converted into a Path of War Brand.

Zinogre

The loyal right-hand storm wolf; the Zinogre and Garurumon material anchors its storm-beast identity.

Mermaid

A friendly, curious, musical aquatic fantasy closer to Ariel than a predatory siren.

Pixie

Tinker Bell is the direct conceptual anchor, without requiring character recreation.

Gargoyle

A general gothic gargoyle rather than a specific Castlevania character.

Jorogumo

Elise anchors the humanoid/spider transformation and combat pattern only.

Specter

Krom and Gray are blended anchors for pet-specter identity and magical utility.

Celebremancer

A serious illithid-style brain-eater/psionic Brand. The name primarily serves trademark avoidance rather than imposing comedy.

Menreiki

Hata no Kokoro remains the conceptual anchor.

Asura

Anchored by Asura's Wrath: divine fury, relentless vengeance, resurrection, and refusal to remain dead. Undeath is supporting expression, and literal escalating multi-arm replication is not required.

Jaguar Sun

An original Aztec-inspired jaguar/sun/blood-war construction, not a Fate-derived reference.

Rakshasa

An infernal shapeshifting predator: deceptive humanoid guise and illusion establish the hunt, tiger-claw violence ends it. Backward hands are folklore texture rather than a mechanical pillar.

Mummy Lord

Menace supplies presentation, personality, and living-scarf combat; Astarte supplies sovereign authority and mandate mechanics.

Yuki-onna

Primarily an ice combatant who flexes between ranged ice casting and close-range freezing.

Houri

A secular fantasy species inspired by celestial beauty, with no real-world religious or cosmological claims.

Tressym

The iconic permanently small winged kitty and right-hand cat. It remains a familiar/scout, not a mount progression.

Manticore

A classic quadrupedal manticore by default. A bipedal interpretation is a GM choice.

Gryphon

A classic gryphon with the Dragon Age baby-gryphon concept anchoring its effectiveness against corruption and blight.

Harlequin

Harley Quinn and the Castlevania Harlequin are intentionally fused rather than divided into separate donor roles. Uses controlled chaos.

Tengu

A general humanoid tengu anchored by Nyotengu: broadly weapon-flexible, with the war fan preferred rather than mandatory.

Unison Device

Reinforce, Eins, Zwei, and Agito are general anchors for one customizable system. Raising Heart is not an anchor, and the devices are not separate mandatory build paths.

Outstanding Mechanical Work

These remain design tasks: choose Jiangshi's remaining favored disciplines; expand Yuki-onna and Tengu; complete Oni Magic integration; resolve the recovered Unison adapter's interfaces. Martial catalogue recovery is now completed.

Genie — Donor Reference

Genie belongs to the Sand Monarch and remains cut as a Night Monarch Brand. This appendix preserves the recovered owning subsystem to audit references such as Angeloid's copied Genie wording; it does not grant a new companion or any Genie talent. Source terminology, numerical conflicts and name-only options remain visible.

Genie Bond

Sand Monarch Companion System • Pathfinder 1e

The Genie Bond represents the Sand Monarch's lifelong partnership with a unique spirit entity — not a djinn, efreeti, marid, or shaitan, but something rarer and more personal. The genie is always humanoid in appearance and present at the Monarch's side in court, in battle, and in private. Think of her as a companion first and a power source second.

The genie companion is separate from the Guardian system entirely. It does not occupy a Guardian slot, does not follow Guardian rules, and does not interact with Guardian class features. The two systems run in parallel.

Baseline Statistics

Vessel and Death

Vessel: The genie is anchored to a physical vessel — a ring, lamp, talisman, or similar object chosen when the bond is first formed. The genie may retreat into this vessel as a swift action and emerge from it as a move action. While inside the vessel the genie is inert and cannot act, but is fully protected from the outside world.

If the Genie is Reduced to 0 HP: The genie retreats to its vessel and cannot be permanently killed while the vessel exists. After one week of recovery the genie returns at full HP. The genie cannot be permanently destroyed by combat damage alone.

If the Vessel is Destroyed: The genie becomes dormant. The Monarch may craft a new vessel with one week of work and appropriate materials, at which point the genie awakens in the new vessel. The genie's personality, memories, and progression are fully preserved.

Genie Companion Progression

Core Features

All of the following are gained automatically and require no talent selection.

Genie's Bounty (Su)

At 1st level the genie grants its master access to all Genie Talents it possesses. The Monarch may use any talent the genie knows, though some talents require the genie's active cooperation. Talents that grant spell-like abilities or transformative effects use the genie's statistics for determining their effects unless otherwise noted.

Spiritual Development (Su)

The genie channels its essence into the Monarch, granting an enhancement bonus to either Strength or Dexterity. This bonus is shown in the Str/Dex Boost column of the progression table.

- **Daily Choice:** The Monarch chooses each morning whether the bonus applies to Strength or Dexterity.
- **Split Bonus (9th level):** Beginning at 9th level the Monarch may divide the boost between Strength and Dexterity in any combination totaling the listed value.

Alertness (Ex)

While the genie is within 30 feet of its master and not inside the vessel, the Monarch gains the Alertness feat, providing a +2 bonus on Perception and Sense Motive checks. If the Monarch already has Alertness, the bonus increases to +4.

Cultivated Power (Su)

At 3rd level the genie chooses an elemental affinity: fire, cold, electricity, or acid. This choice is permanent and defines the genie's elemental identity.

- The Monarch's weapon attacks deal bonus elemental damage of the chosen type. This damage starts at +1d6 at 3rd level and increases at 9th level (+2d6), 15th level (+3d6), and 20th level (+4d6).
- Outside of combat the genie can use its affinity for creative and narrative purposes — conjuring warmth, cooling the air, creating light from a spark, or soothing desert winds.

Elements

Beginning at 2nd level the genie gains elemental affinity slots called Elements, shown in the progression table. These slots represent the genie's deepening mastery of its elemental nature and may be spent to activate additional elemental effects beyond Cultivated Power's baseline damage.

Element slots refresh each day. The specific elemental effects available are determined by the GM and player collaboratively based on the genie's chosen affinity. General guidelines:

Genie Ascension (Su)

At 20th level the genie becomes a near-divine entity, greatly enhancing both its own power and the Monarch's influence. The following effects apply permanently:

- **Wish:** The genie may use wish as a spell-like ability once per day, using the genie's HD as its caster level. This is an alternative access point — non-Sand Monarch classes that bond with a genie companion also gain this ability through the genie at level 20 rather than through a class feature.
- **Immortality Aura:** The genie grants the Monarch immunity to fear and charm effects.
- **Divine Presence:** The Monarch gains a +4 bonus to all Charisma-based skill checks.

Genie Talents

At 2nd level and every even level thereafter the genie selects one talent from the list below. All talents may only be selected once unless otherwise noted. The Monarch may use any talent the genie possesses via Genie's Bounty.

1. **Eye Candy** — The genie radiates supernatural allure. Grants a +4 bonus on Diplomacy and Bluff checks. Once per day the genie may create dazzling illusions in combat, imposing a -2 penalty on enemy attack rolls for 1d4 rounds (Will save negates, DC 10 + 1/2 genie HD + Cha modifier).
2. **Companion of the Lonely** — The genie grants the Companion of the Lonely vigilante talent. The Monarch also gains a +2 morale bonus on saves against fear effects.
3. **Sisterhood of the Master** — The genie harmonizes with all the Monarch's bonded companions. Grants a +1 bonus on Aid Another checks and a +1 insight bonus to AC when an ally is adjacent.
4. **Initiate Magic** — The genie channels its supernatural nature into spell-like abilities. The genie gains access to a number of genie-specific supernatural abilities (elemental bursts, planar awareness, spirit sight) determined by its elemental affinity and HD. These are not drawn from the wizard/sorcerer spell list but are native genie powers. Specific abilities are defined collaboratively by player and GM based on the genie's affinity and narrative.

5. Garden of Delight — Once per day the genie creates an extradimensional sanctuary lasting up to 8 hours. Allies inside the sanctuary gain a +2 bonus on Diplomacy checks and recover hit points at twice the normal rate during rest.

6. Eternal Promise — Once per day the genie may activate one of the following as an immediate action: absorb one attack targeting the Monarch (negating it entirely); grant the Monarch a +2 bonus to all rolls for 1 round; or heal the Monarch for 1d8 + genie HD hit points, taking the same amount as nonlethal damage itself.

7. Crest of the Magic Lord — Minimum genie level 16. The genie channels its near-divine power directly into the Monarch's casting, granting an additional spell slot of a level equal to 1/3 the genie's HD (maximum 5th level). This slot refreshes each day and may be used for any Spheres of Power effect or prepared spell the Monarch knows.

8. Awareness — The genie deepens its perceptual bond with the Monarch. Grants Alertness (stacks with existing bonus), Empathic Link (the Monarch is always aware of the genie's general emotional state regardless of distance), and Share Spells (spells with a target of 'you' may be cast on the genie while it is within 30 ft.).

9. Cultivator — The genie's Spiritual Development bonus may apply to Wisdom and Charisma instead of Strength and Dexterity. The daily choice now includes all four ability scores.

10. Master's New Clothes — The genie enhances the Monarch's appearance with subtle magical glamour. Grants a +2 bonus to Bluff, Diplomacy, and Disguise checks. The genie may also cast disguise self once per day on the Monarch as a spell-like ability.

11. Magi Change (Weapon) — The genie transforms itself into a magical weapon sized for the Monarch. The weapon has an enhancement bonus equal to half the genie's HD (minimum +1, maximum +5) and deals bonus elemental damage matching the genie's affinity. The weapon form may be any weapon the Monarch is proficient with, chosen when this talent is selected. The genie may revert to its normal form as a swift action.

12. Magi Change (Armor) — The genie transforms itself into a suit of magical armor sized for the Monarch. The armor has an enhancement bonus equal to half the genie's HD (minimum +1, maximum +5) and grants energy resistance 10 against the genie's elemental affinity. The armor type is chosen

when this talent is selected. The genie may revert to its normal form as a swift action.

13. Slotted Magi Change — Prerequisite: Magi Change (Weapon) or Magi Change (Armor). Enhances the Magi Change forms with magical enhancement properties (equivalent to weapon/armor special abilities) chosen when the talent is selected, with a total bonus value not exceeding 1/4 the genie's HD.

14. Transportation — The genie unlocks the Carpet of the Sand Monarch companion system, functioning as an alternative entry point equivalent to the Carpet monarch art. If the Monarch already has the Carpet art, this talent instead grants the carpet a permanent +10 ft. speed increase. See the Carpet of the Sand Monarch document for full rules.

15. Genie's Veils — The genie gains the ability to bind veils using Charisma as its veil-weaving ability score. The genie may bind a number of veils equal to 1/4 its HD, accessing the veil list appropriate to its nature. [Akashic Mysteries]

16. Akashic Understanding — Prerequisite: Genie's Veils, genie level 8. Upgrades the genie to a full veil weaver with access to all standard chakra slots. The genie's essence pool equals its HD. [Akashic Mysteries]

17. Genie Blow — The genie delivers a massive elemental strike as a natural weapon attack. This is a standard melee attack using the genie's attack bonus, dealing 2d6 + Charisma modifier in damage of the genie's elemental affinity type. This scales by +1d6 every 4 genie levels (3d6 at level 4, 4d6 at level 8, and so on to a maximum of 7d6 at level 20).

18. Courtly Secrets — The genie's accumulated knowledge of courts and rulers flows to the Monarch. Grants Bardic Lore (adds 1/2 genie HD to Knowledge checks, all Knowledge checks untrained). If the Monarch already has Royal Lore, the genie's bonus adds an additional +2 insight bonus instead.

19. Elemental Bolt — The genie fires a ranged elemental attack as a standard action with a range of 60 ft. It deals 1d6 elemental damage per 3 genie HD (maximum 6d6 at HD 18). This is a ranged touch attack using the genie's attack bonus.

20. Elemental Armor — The genie shrouds the Monarch in swirling elemental energy as a swift action, lasting 1 minute per activation. While active: the Monarch gains energy resistance 10 against the genie's elemental affinity, and creatures that strike the Monarch with melee attacks take 1d6 elemental

damage of the genie's affinity type. The genie may end this effect early as a free action.

Genie Completion Ledger

The affinity prose begins at level 3 while Elements begin at level 2. The element guidelines and Cultivated Power prose disagree on damage thresholds. Crest of the Magic Lord uses spell slots for sphere effects without defining that interface. Carpet requires its missing owning document. Name-only mystic-blow and support options remain reserves. Tables and donor text are preserved; none of these issues is silently normalized.

Current Edition Notes

Source Authority

The revised master governs class identity and unchanged mechanics. The uploaded Night Monarch Revision Packet supplies recovered source evidence. The author separately confirmed its Crimson Elixir replacement in this chat. Full original packet, feature inventory and table audit accompany this edition.

Preserved Cuts

The blood-point economy remains removed. Blood Pool, Dark Claim, Rejuvenation, Sanguine Invigoration, Conversion, Blood Surge and Dark Harvest remain cut. Harlequin Gambler's old blood rule remains cut. Crimson Elixir is restored without blood points. Infernal Stride, Gargoyle Perfect Defense and Extended Palate retain their prior non-blood rules. Armament, Armament Expertise, Extra Armament, Abysscraft, Crimson Rites and the Genie Brand remain cut.

Outstanding Rules

Unison's acquisition and host mapping, barrier overlap/reset, missing progression feature bodies and Fast Unison, stored-spell interfaces, Puppet Mode timing and several talent interfaces remain unfinished. Crimson Elixir needs a healing caster level and exact vampire-template source/eligibility. Jiangshi's remaining disciplines, Yuki-onna/Tengu expansion, Oni integration, Blended Training table/prose and copied donor conflicts are unresolved. This is a source-recovery revision, not a mechanically complete redesign.
