Guardian System

Universal Rules — Updated

Guardian System — Universal Rules

Core Concept

A Guardian is not a summon, companion, or familiar.

A Guardian is a **combat paradigm** — a bonded spiritual framework that defines how a character fights and expresses their abilities. Guardians do not act independently and do not exist as separate creatures. They are extensions of the user's will.

Each Guardian represents a distinct playstyle or role. A character may maintain multiple Guardians, but may only express one at a time.

Guardians function as a flexible loadout system. Each one is configured independently, with its own archetype and talents, and represents a deliberate choice in how the character is built.

Maintaining a Guardian is a commitment. Dedicating a Guardian to a specific function — such as combat, utility, or social interaction — occupies part of the character's overall capacity. This prevents a character from accessing all roles at once and enforces meaningful tradeoffs.

Forming a Bond

Any character may, through bond, oath, or resonance, form a pact with a Guardian spirit. Guardians may be understood as animal totems, primal entities, ancestral souls, or mythic beings (such as loa or orisha), as appropriate to the campaign's culture and the player's vision.

A Guardian bond is not automatic. It must be established through one of the following:

Oath (Concord): A ritual, vow, or alignment of intent between character and Guardian, often sealed through symbolic acts such as shared drink, spoken vows, or other culturally significant rites.

Resonance: A trial, conflict, or shared experience through which the character proves compatibility with the Guardian.

Both methods result in mutual recognition between character and spirit.

Gaining a Guardian

When a character gains a Guardian — whether at a class milestone, through a talent, or via another source — they must assign it an archetype. Each Guardian is defined by:

- one archetype
- a set of selected talents
- progression based on Guardian Hit Dice (HD) Each Guardian is configured independently.

Definitions

Guardian: A selectable loadout that defines a playstyle.

Archetype: A ruleset applied to a Guardian.

Talent: A selectable upgrade tied to a specific Guardian.

Level 1 Special Abilities

Every Guardian archetype grants three abilities at 1st level: Guardian Bounty, Spiritual Development, and Alertness. These are defined as follows:

Guardian Bounty: The core resource or progression system granted by this archetype. What this means depends on the archetype — see each archetype's section for its specific Bounty. Sphere Guardian: sphere talents. Martial Guardian: Path of War maneuver progression. Rune Guardian: runes. Sura Guardian: imprints. Invocation Guardian: invocations. Geomancy Guardian: geomancy (pending).

Spiritual Development: The Guardian enhances the physical capabilities of bound creatures. This manifests as the Str/Dex boost shown in the archetype's progression table, which increases at specific Guardian HD thresholds.

Alertness: While this Guardian is active, the user gains the Alertness feat, as per the standard familiar ability of the same name.

Active Guardian Rule

A character may have only one active Guardian at a time. Only the active Guardian:

- grants abilities and bonuses
- satisfies prerequisites
- interacts with class features

All other Guardians are inactive and provide no benefits unless explicitly stated.

Switching Guardians

A character may switch their active Guardian as a **swift action**. When switching:

- the previous Guardian becomes inactive
 - the new Guardian becomes active immediately
 - effects granted by the previous Guardian end unless explicitly stated otherwise
- Switching Guardians does not restore or refresh expended resources.**

Archetypes

Each Guardian has an archetype which defines its available talents, mechanics, interactions, and playstyle identity. A character may have multiple Guardians with the same or different archetypes. Archetypes do not stack unless explicitly stated.

Martial Guardian — Path of War Clause: *If a character holds three or more Martial Guardian slots simultaneously, they are considered to have the Path of War clause active, which may unlock additional options or interactions as defined by class features or talents that reference this clause.*

Resource Continuity

Resources belong to the archetype, not to an individual Guardian slot. Runes, maneuvers, SP, imprints, and similar tracked resources are archetype-scoped.

- Switching between Guardians of the **same archetype** does not restore resources. Three Rune Guardians share one rune economy. Three Martial Guardians share one maneuver economy.
- Switching to a **different archetype** grants access to that archetype's current resource state, which may be fully available or partially spent depending on what has already been used this encounter.

The design intent is tactical flexibility — access a different toolset in the moment, not recycle burned resources.

Talents

Talents are selected for a specific Guardian. Each talent is one of the following:

Active: Functions only while its Guardian is active.

Passive: Applies to the character regardless of which Guardian is active. Must be explicitly stated as Passive.

Unless stated otherwise, all talents are Active. A talent applies only to the Guardian it is selected for.

Progression and Stacking

All Guardians scale using Guardian Hit Dice (HD). Archetypes modify this progression by adding features, altering interactions, and expanding talent options. They do not replace base progression unless explicitly stated.

If a character gains Guardian progression from multiple sources, use the highest progression available. Do not stack multiple progressions unless explicitly stated.

System Role

Guardians function as a flexible combat system, allowing a character to switch between distinct modes of play. Each Guardian is internally complete but externally exclusive — its abilities function only while it is active, and switching to another Guardian means leaving those abilities behind until you switch back.

Sphere Guardian

The Sphere Guardian archetype hooks into the Spheres of Power and Spheres of Might systems. Its talents extend, augment, and interact with sphere abilities the character already possesses. A character without sphere access may still take this archetype, but many talents will have limited application until sphere abilities are acquired.

Level	Hit Dice	Special	Str/Dex Boost	Talents per Guardian
1	1	Guardian Bounty, Spiritual Development, Alertness	—	2
2	1	Guardian Talent	—	3
3	2	Cultivated Power	+0	3
4	3	Guardian Talent	+0	4
5	3	—	+2	4
6	4	Guardian Talent	+2	5
7	5	—	+2	5
8	6	Guardian Talent	+2	6
9	6	—	+4	6
10	7	Guardian Talent	+4	7
11	8	—	+4	7
12	9	Guardian Talent	+4	8
13	9	—	+6	8
14	10	Guardian Talent	+6	9
15	11	—	+6	9
16	12	Guardian Talent	+6	10
17	12	—	+8	10
18	13	Guardian Talent	+8	11

19	14	—	+8	11
20	15	—	+8	12

Sphere Guardian Talents

1. 1. Resonance

Requirement: Must resonate with an individual or complete a significant bonding event.

The Guardian forms a spiritual connection with a significant individual, allowing the Guardian's user to gain an additional Guardian. This Guardian is added to the user's reserve and follows all normal rules for reserve and active Guardians. The process of Resonance requires a ritual or shared experience with the bonded individual, as determined by the GM.

2. 2. Translator

The Guardian's knowledge extends to languages, allowing its user to gain fluency in two additional languages. These languages must be selected from those commonly available in the campaign world or granted at the GM's discretion based on the Guardian's nature or origin.

3. 3. Tengu's Expertise

The Guardian imparts expertise in weaponry, allowing the user to wield any weapon they pick up with ease. The user gains proficiency with any weapon they wield for 24 hours, as long as they are in possession of the Guardian. This does not grant access to special abilities tied to specific class features, such as fighter weapon training.

4. 4. Guardian Weapon

The Guardian manifests an independent spiritual weapon tied to its essence. This weapon appears in the user's hand or at their side — it is not an augment or enchantment applied to an existing weapon. The manifested weapon is treated as a +1 magical weapon and scales with the Guardian's Hit Dice: At 5 HD: +2 magical weapon. At 10 HD: +3 magical weapon. At 15 HD: +4 magical weapon. At 20 HD: +5 magical weapon. The weapon's form is chosen when the talent is selected (e.g., a sword, staff, or bow) and cannot be changed afterward. The weapon exists only while the Guardian is active and disappears if the Guardian is switched to reserve.

5. 5. Guardian Magic

The Guardian grants access to limited spellcasting, but only for self-targeted effects. The user can cast spells granted by the Guardian as if they were spell-like abilities. At 3 HD: Choose two 1st-level self-targeting spells. At 6 HD: Add one 2nd-level self-targeting spell. At 9 HD: Add one 3rd-level self-targeting spell. Spells can be used a total number of times per day equal to the user's Charisma modifier, divided among all known spells.

6. 6. Guardian's Instincts

The Guardian sharpens the user's senses, granting them heightened awareness. The user gains: +2 bonus on Perception checks to detect hidden enemies, traps, and dangers; the ability to sense the presence of traps within 30 feet as if using the spell detect traps. At 10 Guardian Hit Dice, the user gains blindsense out to 10 feet.

7. 7. Spirit-Boosted Body

The Guardian enhances the user's vitality, granting them temporary hit points equal to half the Guardian's total Hit Dice.

These temporary hit points are refreshed whenever the Guardian is summoned or switched from reserve to active.

8. Grace

The Guardian channels its spiritual energy into the user, granting them a +4 enhancement bonus to Charisma and a +2 enhancement bonus to either Intelligence or Wisdom (chosen when the talent is selected). These bonuses increase by +2 and +1, respectively, for every 5 Guardian Hit Dice.

9. 9. Born of Oath

The user gains one additional Guardian reserve slot. This slot follows all normal rules for reserve Guardians.

10. 10. Awareness

The Guardian's user gains the benefits of a familiar. This includes the Alertness feat while the Guardian is active, as well as an increase to Perception and Reflex saves by +2. The user also gains access to the Guardian's enhanced senses, such as darkvision (if the Guardian has it).

11. 11. Parry and Riposte

When the user is targeted by a melee attack, they can use an immediate action to parry, rolling an attack roll. If their result exceeds the attacker's roll, the attack is negated, and the user can make a single counterattack at their highest base attack bonus. This talent can be used once per encounter, plus an additional time for every 5 Guardian Hit Dice.

12. 12. Linger

When a spell, buff, or ability granted by the Guardian ends, its effects persist for 1 additional round. This talent only applies to effects granted directly by the Guardian.

13. 13. Greater

Requirement: Guardian Hit Dice 10+

Choose one Guardian talent; its effects are doubled (e.g., bonuses increase, temporary HP doubles, or duration extends).

This talent can be selected multiple times, but must apply to a different talent each time.

14. 14. Rejuvenation

When the Guardian is summoned or switched to active, the user regains a number of hit points equal to the Guardian's Hit Dice. This effect can only occur once per encounter.

15. 15. Focusing Bond

The Guardian aids the user's focus, allowing them to recover from distraction or confusion. The user can reroll a failed Will save against mind-affecting effects once per day. At 10 Guardian Hit Dice, this ability can be used twice per day.

16. 16. Karma Chameleon

The Guardian enables the user to adapt their social presence, allowing them to project an air of authority. The user can treat their social rank as if they were 1/4 their level higher, to a minimum of 1, when interacting with NPCs. This improves Diplomacy checks or other social interactions where status matters.

17. 17. Resolute Bond

Once per day, the user can reroll a failed saving throw against a harmful condition (e.g., paralyzed, poisoned, or stunned).

They must accept the second result, even if it is worse.

18. 18. Spiritual Cloak

The user gains resistance 5 against spells or spell-like abilities. This resistance increases to 10 at 10 Guardian Hit Dice and 15 at 15 Guardian Hit Dice.

19. 19. Eyes of Sacred Luan

While this talent is active, your companion becomes a conduit for your divine perception. You are constantly aware of strong emotional states and hidden hostility in a 60 ft. radius through your companion's senses. When your companion enters a new area or observes a creature for the first time, you may ask the GM one of the following questions (no action,

1/encounter): 'Is this individual emotionally or narratively significant?' / 'Is there immediate danger tied to this location?' / 'Is this the true focus of this encounter?' The GM must respond truthfully, but may use symbolic or intuitive phrasing. You may still use this perception to trigger Guardian or Ravager reflexes, including Piercing Denial, Foresight Response, or Judgment Pulse if applicable.

20. 20. Guardian Bounty

The Guardian provides additional resources or boons tied to its nature. The specific benefits are determined by the GM in collaboration with the player, reflecting the Guardian's unique essence and the character's bond with it.

21. 21. Spiritual Development

The Guardian grows alongside its user, unlocking deeper aspects of its nature at key milestones. The GM and player define what new abilities or traits emerge as the Guardian matures.

Martial Guardian

Path of War Clause: A character holding three or more Martial Guardian slots simultaneously is considered to have the Path of War clause active, which may unlock additional interactions as defined by relevant class features and talents.

Level	Hit Dice	Special	Str/De x	Known	Readie d	Stances
1	1	Guardian Bounty, Spiritual Development, Alertness	—	3	3	1
2	1	Guardian Talent	—	4	3	1
3	2	Cultivated Power	+0	5	3	1
4	3	Guardian Talent	+0	6	4	2
5	3	—	+2	6	4	2
6	4	Guardian Talent	+2	6	4	2
7	5	—	+2	7	4	3
8	6	Guardian Talent	+2	7	4	3
9	6	—	+4	8	4	3
10	7	Guardian Talent	+4	8	5	3
11	8	—	+4	9	5	4
12	9	Guardian Talent	+4	9	5	4
13	9	—	+6	10	5	5
14	10	Guardian Talent	+6	11	5	5
15	11	—	+6	11	6	5
16	12	Guardian Talent	+6	12	6	5
17	12	—	+8	13	6	5
18	13	Guardian Talent	+8	14	6	5
19	14	—	+8	14	6	5
20	15	—	+8	15	7	5

Martial Guardian Talents

1. 1. Adaptive Flow

When you switch to a different guardian progression (such as from Guardian 1 to Guardian 2), you may recover one expended maneuver as a free action. Additionally, if you begin your turn

without any maneuvers readied, you may recover one maneuver as a swift action.

2. 2. Extra Maneuver

You learn one additional maneuver of any level you can initiate from a discipline available to the Martial Guardian. You may select this talent multiple times; each time, you gain a new maneuver.

3. 3. Stance Mastery

You may enter a new stance as a swift action, even if you are already in a stance. Alternatively, as a free action once per round, you can maintain your current stance while initiating a maneuver.

4. 4. Style Blending

You may treat any Sphere Martial Talent or Combat Style Feat as if it were a Path of War style feat for the purposes of qualifying for or using Path of War maneuvers. Additionally, you may use Perform (Dance) or another Perform skill in place of an attack roll for maneuvers from Mithral Current, Veiled Moon, or Thrashing Dragon.

5. 5. Mystic Stance Dance

This talent only functions while a Martial Guardian is active. Once per turn, you may combine a spell or sphere ability with a martial maneuver as part of the same action, following normal spell strike rules. Both the spell or sphere ability and the maneuver pay their standard action costs separately. This allows you to execute abilities such as a Black Seraph maneuver alongside a sphere effect in a single fluid strike. This talent provides no benefit while any other archetype is active.

6. 6. Spirit-Boosted Body

While under the effects of a stance, you gain temporary hit points equal to your Charisma modifier (minimum 1) at the start of your turn. These temporary hit points stack with other sources but vanish at the end of your turn.

7. 7. Focusing Bond

Once per encounter, when you initiate a maneuver, you may reroll the attack roll or skill check associated with the maneuver. You must take the second result, even if it is worse.

8. 8. Lingering Flow

When you initiate a maneuver, you may take a 5-foot step as a free action, even if you've already moved during your turn. If the maneuver misses all targets, you may instead use this talent to recover the maneuver as a swift action.

9. 9. Lightning Recovery

You may recover one expended maneuver as a free action once per encounter. Additionally, you gain a +2 bonus to initiative checks.

10. 10. Rejuvenation

When the Guardian is summoned or switched to active, the user regains a number of hit points equal to the Guardian's Hit Dice. This effect can only occur once per encounter.

11. 11. Focusing Bond (Will)

The user can reroll a failed Will save against mind-affecting effects once per day. At 10 Guardian Hit Dice, this ability can be used twice per day.

12. 12. Karma Chameleon

The user can treat their social rank as if they were 1/4 their level higher, to a minimum of 1, when interacting with NPCs.

13. 13. Guardian's Instincts

The Guardian sharpens the user's senses: +2 bonus on Perception checks to detect hidden enemies, traps, and dangers; sense traps within 30 feet as detect traps. At 10 Guardian Hit Dice, blindsense out to 10 feet.

14. 14. Grace

The Guardian grants a +4 enhancement bonus to Charisma and a +2 enhancement bonus to either Intelligence or Wisdom.

These bonuses increase by +2 and +1, respectively, for every 5 Guardian Hit Dice.

15. 15. Born of Oath

The user gains one additional Guardian reserve slot. This slot follows all normal rules for reserve Guardians.

16. 16. Awareness

The user gains the benefits of a familiar: Alertness feat while the Guardian is active, +2 to Perception and Reflex saves, and access to the Guardian's enhanced senses.

17. 17. Resonance

Requirement: Must resonate with an individual or complete a significant bonding event.

The Guardian forms a spiritual connection with a significant individual, granting the user an additional Guardian in reserve.

Requires a ritual or shared experience as determined by the GM.

18. 18. Translator

The Guardian's user gains fluency in two additional languages selected from those commonly available in the campaign world.

19. 19. Tengu's Expertise

The user gains proficiency with any weapon they wield for 24 hours while in possession of the Guardian. Does not grant access to class-specific weapon features.

Sura Guardian

Level	Hit Dice	Special	Str/Dex Boost	Sura Imprints
1	1	Guardian Bounty, Spiritual Development, Alertness	—	2
2	1	Guardian Talent	—	3
3	2	Dread Cloak	+0	3
4	3	Guardian Talent	+0	4
5	3	—	+2	4
6	4	Guardian Talent	+2	5
7	5	—	+2	5
8	6	Guardian Talent	+2	6
9	6	—	+4	6
10	7	Guardian Talent	+4	7
11	8	—	+4	7
12	9	Guardian Talent	+4	8
13	9	—	+6	8
14	10	Guardian Talent	+6	9

15	11	—	+6	9
16	12	Guardian Talent	+6	10
17	12	—	+8	10
18	13	Guardian Talent	+8	11
19	14	—	+8	11
20	15	—	+8	12

Sura Guardian Talents

1. 1. Resonance

Requirement: Must resonate with an individual or complete a significant bonding event.

The Guardian forms a spiritual connection with a significant individual, granting the user an additional Guardian in reserve.

2. Translator

The user gains fluency in two additional languages.

3. Tengu's Expertise

The user gains proficiency with any weapon they wield for 24 hours while in possession of the Guardian.

4. Guardian's Instincts

+2 Perception vs hidden enemies/traps; sense traps within 30 ft as detect traps. At 10 HD: blindsense 10 ft.

5. 5. Spirit-Boosted Body

Gain temporary HP equal to half the Guardian's total Hit Dice. Refreshed on summon or reserve-to-active swap.

6. Grace

+4 Charisma, +2 Intelligence or Wisdom enhancement. Increases by +2/+1 per 5 Guardian Hit Dice.

6. Born of Oath

The user gains one additional Guardian reserve slot. This slot follows all normal rules for reserve Guardians.

7. Awareness

Gain familiar benefits: Alertness feat, +2 Perception and Reflex saves, Guardian's enhanced senses.

8. Reduce SP Cost

Reduce the SP cost of one Imprint by 1 (min 0). May be taken multiple times, each applying to a different Imprint.

9. Twin Imprint Channeling

Once per round, activate two Imprints simultaneously. If both require an action, total cost becomes a Full-Round Action.

10. Echoed Imprint

Once per turn, if you strike a creature affected by an Imprint this round, repeat its effect on a second adjacent target.

11. 12. Crowned Reservoir

When entering Crowned form, regain 1d4 SP instantly. Extend its duration by 1 round by spending 1 SP (max +Cha mod per day).

12. Abyssal Resonance

Treat Imprints as magical weapons for overcoming DR/magic; apply weapon enchantments to them as if wielded.

13. Imprint Surge

Once per short rest, use an Offensive Imprint as a Swift Action instead of a Standard Action.

14. 15. Crucible Pulse

When you hit a creature with an Imprint attack, force a Fortitude save (DC = 10 + 1/2 level + Cha mod) or become staggered for 1 round. 1/round.

15. Wound-Binding Strike

When an Imprint deals damage, spend 1 SP to suppress the target's fast healing and regeneration for 1d4 rounds.

16. Sura Riposte

As an Immediate Action after being struck, spend 1 SP to activate a single Offensive Imprint against the attacker.

17. 18. Exalted Wrath

Requirement: Level 10+

If your target is below half HP, Offensive Imprints deal +1 damage per class level.

18. Spirit Blink

Once per round when you activate an Imprint, teleport up to 10 feet before or after the effect resolves.

19. Imprint Step

Treat Offensive Imprints as part of a charge or Spring Attack, resolving the Imprint at any point during movement.

20. Shadow Walk

If you use Soul Shear, Dark Pulse, or Abyss Spike this round, gain concealment (20%) until the start of your next turn.

21. Battlefield Imprint

Imprints with a ranged area leave a lingering field for 1 round; enemies that enter take 1d6 + Cha mod damage.

22. Spiritual Overflow

When reduced to 0 SP, regain 1 SP automatically. Can only trigger once per day.

23. Imprint Reservoir

Gain 1 additional SP; maximum SP increases by 2. May be taken multiple times.

24. Pulse Sync

Choose a Passive Imprint. Treat it as both Passive and Active, gaining full scaling on its damage/effect.

25. Mystic Apex

Imprint save DCs gain +1 if the target has already been affected by any Imprint this turn.

26. Echo of the Crowned King

While in Crowned Form, Imprints ignore all resistance/immunity to their damage type.

27. Final Brand

Once per long rest, select one Imprint to activate as a free action, even if another is active. That Imprint lasts for 1 minute.

Invocation Guardian

The Invocation Guardian archetype hooks directly into the Warlock's existing invocation system. This archetype does not grant its own standalone invocation pool — instead its talents augment, extend, and interact with invocations the Warlock already knows. Companions gained through invocations such as Cerebremancer (illithid), Succubus, and Pixie are permanent residents hosted via Dominion of Soul (a Soma Cruz-style soul absorption mechanic), not temporary summons. Umbra Sight and Crimson Tide are separate talents each directing a different invocation. Crimson Tide is bleed-gated: it stacks with each bleed on the target and provides no benefit if the target has no active bleed. Infernal Garrison conjures a demonic squad in the tradition of Shin Megami Tensei V.

Level	Hit Dice	Special	Str/Dex Boost	Invocations
1	1	Guardian Bounty, Spiritual Development, Alertness	—	2
2	1	Guardian Talent	—	3
3	2	Dread Cloak	+0	3
4	3	Guardian Talent	+0	4
5	3	—	+2	4
6	4	Guardian Talent	+2	5
7	5	—	+2	5
8	6	Guardian Talent	+2	6
9	6	—	+4	6
10	7	Guardian Talent	+4	7
11	8	—	+4	7
12	9	Guardian Talent	+4	8
13	9	—	+6	8
14	10	Guardian Talent	+6	9
15	11	—	+6	9
16	12	Guardian Talent	+6	10
17	12	—	+8	10
18	13	Guardian Talent	+8	11
19	14	—	+8	11
20	15	—	+8	12

Invocation Guardian Talents

1. 1. Resonance

Requirement: Must resonate with an individual or complete a significant bonding event.

The Guardian forms a spiritual connection with a significant individual, granting the user an additional Guardian in reserve.

2. 2. Translator

The user gains fluency in two additional languages.

3. 3. Tengu's Expertise

The user gains proficiency with any weapon they wield for 24 hours while in possession of the Guardian.

4. 4. Guardian's Instincts

+2 Perception vs hidden enemies/traps; sense traps within 30 ft as detect traps. At 10 HD: blindsense 10 ft.

5. Spirit-Boosted Body

Gain temporary HP equal to half the Guardian's total Hit Dice. Refreshed on summon or reserve-to-active swap.

6. Grace

+4 Charisma, +2 Intelligence or Wisdom enhancement. Increases by +2/+1 per 5 Guardian Hit Dice.

7. Born of Oath

The user gains one additional Guardian reserve slot. This slot follows all normal rules for reserve Guardians.

8. Awareness

Gain familiar benefits: Alertness feat, +2 Perception and Reflex saves, Guardian's enhanced senses.

9. 9. Dark Focus

Choose one invocation you know. Its numeric bonuses increase by +1. If it grants no numeric bonus, use it one additional time per day. You may change the chosen invocation whenever you gain a level.

10. 10. Guardian's Blessing

Companions gained through invocations — including permanent companions hosted via Dominion of Soul such as Cerebremancer (illithid/brain eater), Succubus, and Pixie — gain +2 to all saving throws and a +2 enhancement bonus to one ability score of your choice. This bonus applies persistently to hosted companions and does not require re-summoning.

11. 11. Ward of the Veil

While benefiting from an invocation that grants a defensive bonus (DR, concealment, or saves), gain a +2 bonus to AC against attacks from incorporeal or planar creatures.

12. 12. Occult Sentinel

If you possess Umbra Sight, sense hidden portals, haunts, or planar overlaps within 30 feet as if constantly under detect magic focused on planar phenomena.

13. 12. Umbra Sight

You gain the ability to perceive the Umbra realm, seeing into it as if it were overlaid on the material world. This is vision only — you cannot enter, interact with, or be perceived by entities within the Umbra through this talent alone. Travel to the Umbra requires the World Walker invocation. This talent directs the Eyes invocation toward the Umbra.

14. 12. Crimson Sight

You gain the ability to perceive the Crimson realm (Realm of Azyr), seeing into it as if it were overlaid on the material world. This is vision only — you cannot enter or travel to the Crimson realm through this talent. Entering the Crimson realm without World Walker risks exposure to Balor. This talent directs the Eyes invocation toward the Crimson realm.

15. 12. Crimson Tide

This talent is bleed-gated: it provides no benefit against a target with no active bleed. While a target has one or more active bleed effects, you may channel through those bleeds, gaining escalating power for each bleed stack on the target. The specific scaling effects are defined by the associated invocation. No bleed on target means no access.

16. 13. Soulkeeper's Grip

When using Grim Harvest or Dominion of Soul, you may host one additional entity in your Soul Capacity. Dominion of Soul is the primary mechanic by which permanent companions (Cerebremancer, Succubus, Pixie, and similar) are hosted indefinitely within the user.

17. 14. Shifting Shadows

While using Dark Form or any invocation that grants concealment, move through occupied spaces without provoking attacks of opportunity.

18. 15. Planar Affinity

If you use World Walker, you are never disoriented or delayed when shifting planes, and can sense the safest arrival point within 1 mile.

19. 16. Witch's Charm

When using Rites of Hexerai, your hex DC increases by +1 and you may use each hex one additional time per day.

20. 17. Mask of Night

When using Poe's Masquerade, your transformation is undetectable by divination magic unless the caster succeeds at a caster level check (DC 11 + your level).

21. 18. Infernal Legionnaire

When using Infernal Garrison — which conjures a demonic squad in the tradition of Shin Megami Tensei V — your summoned demons gain +1 hit point per Hit Die and a +1 bonus on attack rolls.

Rune Guardian

The Rune Guardian archetype hooks into the Legendary Games rune system. Its talents augment, extend, and interact with runes the character already has access to through that system. A character without access to Legendary Games runes may still take this archetype, but most talents will have limited application until rune access is established.

Level	Hit Dice		Special	Str/Dex Boost	Talents per Guardian	Runes Known
1	1	G	Guardian Bounty, Spiritual Development, Alertness	—	2	2
2	1		Guardian Talent	—	3	3
3	2		Cultivated Power	+0	3	3

19	14		—	+8	11	11
20	15		—	+8	12	12

Rune Guardian Talents

1. Resonance

Requirement: Must resonate with an individual or complete a significant bonding event.

The Guardian forms a spiritual connection with a significant individual, granting the user an additional Guardian in reserve.

1. Translator

The user gains fluency in two additional languages.

2. Tengu's Expertise

Proficiency with any weapon wielded for 24 hours while in possession of the Guardian.

4. Guardian Weapon

Manifests an independent spiritual weapon — not an augment on an existing weapon. +1 magical at base, scaling to +2 at 5

HD, +3 at 10 HD, +4 at 15 HD, +5 at 20 HD. Form chosen at selection and cannot be changed. Disappears if Guardian enters reserve.

1. Guardian's Instincts

+2 Perception vs hidden enemies/traps; sense traps within 30 ft as detect traps. At 10 HD: blindsense 10 ft.

2. Spirit-Boosted Body

Temporary HP equal to half the Guardian's total Hit Dice. Refreshed on summon or reserve-to-active swap.

3. Grace

+4 Charisma, +2 Intelligence or Wisdom enhancement. Increases by +2/+1 per 5 Guardian Hit Dice.

4. Born of Oath

The user gains one additional Guardian reserve slot. This slot follows all normal rules for reserve Guardians.

5. Awareness

Familiar benefits: Alertness feat, +2 Perception and Reflex saves, Guardian's enhanced senses.

6. Extra Rune Known

Learn one additional rune of any type you qualify for. May be selected multiple times; each time you learn a different rune.

7. Clustered Runes

Once per round, when you activate a rune, you may also activate a second rune you know. If both require actions, total cost becomes a full-round action. If one is swift/immediate, increase total cost by one step. Both runes discharge normally.

Cannot be used if either rune would normally be unusable.

8. Focusing Rune

While this Guardian is active, gain martial focus as if you had a Spheres of Might practitioner progression equal to half your character level (min 1). Once per encounter, when you activate a rune, regain martial focus as a free action.

9. Runic Lore

+4 competence bonus on Knowledge (arcana), Spellcraft, and Linguistics checks related to runes, glyphs, magical inscriptions, wards, and ancient scripts. Once per day, ask the GM one question about a rune you can see or have studied for 1 minute: 'What is its general purpose?' / 'Is it dangerous or unstable?' / 'Is it incomplete, altered, or corrupted?' The GM must answer truthfully, though symbolically if the magic is obscure.

10. Underbreath Utterance

Activate spoken runes without speaking or gesturing, removing verbal and somatic requirements. Does not bypass unconscious/paralyzed states or antimagic effects.

11. Eyes of Sacred Luan

Your companion becomes a conduit for divine perception. Constant awareness of strong emotional states and hidden hostility in 60 ft. Once per encounter when your companion enters a new area or first observes a creature, ask the GM one of three questions without using an action.

12. Deep Engraving

Choose one rune you know. Treat its mastery/potency as +2 higher for numerical effects (cannot exceed normal caps). May be selected multiple times, each applying to a different rune.

13. Lingering Sigils

When you switch away from this Guardian, choose one active rune effect you created. That effect persists for 1 additional round.

14. Runic Economy

Once per encounter, when you discharge a rune, choose to not discharge it. If you do, the rune's effect is reduced by half.

15. Overcharged Glyph

Once per encounter, when you activate a rune, double its numerical effects for that activation. After this, that rune is drained instead of discharged.

16. Runic Reflex

Once per encounter, activate a spoken rune as an immediate action instead of its normal action.

17. Persistent Inscription

Choose one written rune you know. While this Guardian is active, that rune does not discharge when used (if it normally would), but its duration is halved (minimum 1 round).

18. Sigil Mastery

Requirement: Guardian HD 10+

Choose one rune you know. Its effects are treated as if affected by your Greater talent. May be taken multiple times; each time applies to a different rune.

19. Runic Memory

When you switch away from this Guardian and later switch back, immediately reactivate one rune you had active before the swap without spending an action. It still discharges normally.

Geomancy Guardian

This archetype is pending completion pending access to the relevant source material. The table structure below is reserved. Talent list to be added in a future revision.

Level	Hit Dice	Special	Str/Dex Boost	Talents per Guardian	infusions known

Infusion guardian

1. Resonance

Requirement: Must resonate with an individual or complete a significant bonding event.

The Guardian forms a spiritual connection with a significant individual, allowing the Guardian's user to gain an additional Guardian. This Guardian is added to the user's reserve and follows all normal rules for reserve and active Guardians. The process of Resonance requires a ritual or shared experience with the bonded individual, as determined by the GM.

2. Translator

The Guardian's knowledge extends to languages, allowing its user to gain fluency in two additional languages. These languages must be selected from those commonly available in the campaign world or granted at the GM's discretion based on the Guardian's nature or origin.

3. Tengu's Expertise

The Guardian imparts expertise in weaponry, allowing the user to wield any weapon they pick up with ease. The user gains proficiency with any weapon they wield for 24 hours, as long as they are in possession of the Guardian. This does not grant access to special abilities tied to specific class features, such as fighter weapon training.

4. Guardian Weapon

The Guardian manifests an independent spiritual weapon tied to its essence. This weapon appears in the user's hand or at their side — it is not an augment or enchantment applied to an existing weapon. The manifested weapon is treated as a +1 magical weapon and scales with the Guardian's Hit Dice: At 5 HD: +2 magical weapon. At 10 HD: +3 magical weapon. At 15 HD: +4 magical weapon. At 20 HD: +5 magical weapon. The weapon's form is chosen when the talent is selected (e.g., a sword, staff, or bow) and cannot be changed afterward. The weapon exists only while the Guardian is active and disappears if the Guardian is switched to reserve.

5. Guardian Magic

The Guardian grants access to limited spellcasting, but only for self-targeted effects. The user can cast spells granted by the Guardian as if they were spell-like abilities. At 3 HD: Choose two 1st-level self-targeting spells. At 6 HD: Add one 2nd-level self-targeting spell. At 9 HD: Add one 3rd-level self-targeting spell. Spells can be used a total number of times per day equal to the user's Charisma modifier, divided among all known spells.

6. Guardian's Instincts

The Guardian sharpens the user's senses, granting them heightened awareness. The user gains: +2 bonus on Perception checks to detect hidden enemies, traps, and dangers; the ability to sense the presence of traps within 30 feet as if using the spell detect traps. At 10 Guardian Hit Dice, the user gains blindsense out to 10 feet.

7. Spirit-Boosted Body

The Guardian enhances the user's vitality, granting them temporary hit points equal to half the Guardian's total Hit Dice.

These temporary hit points are refreshed whenever the Guardian is summoned or switched from reserve to active.

8. Grace

The Guardian channels its spiritual energy into the user, granting them a +4 enhancement bonus to Charisma and a +2 enhancement bonus to either Intelligence or Wisdom (chosen when the talent is selected). These bonuses increase by +2 and +1, respectively, for every 5 Guardian Hit Dice.

9. Born of Oath

The user gains one additional Guardian reserve slot. This slot follows all normal rules for reserve Guardians.

10. Awareness

The Guardian's user gains the benefits of a familiar. This includes the Alertness feat while the Guardian is active, as well as an increase to Perception and Reflex saves by +2. The user also gains access to the Guardian's enhanced senses, such as Darkvision (if the Guardian has it).

11. Extra Infusion

You learn one additional infusion from the Infusion list.

You may select this talent multiple times. Each time, you learn a different infusion.

12. Rapid Installation

You may apply an infusion as a move action instead of a standard action.

At 10 Guardian Hit Dice, once per encounter, you may apply an infusion as a swift action.

13. Emergency Patch

Once per encounter, as an immediate action, you may apply one known infusion to yourself or an adjacent willing ally.

The infusion must be Bolstering Infusion, Rejuvenating Infusion, Revitalizing Infusion, Angelic Infusion, Focusing Infusion, or another defensive infusion approved by the GM.

An infusion applied this way lasts for 1 round per Guardian Hit Die unless its normal duration would be shorter.

14. Twin Installation

When you apply an infusion, you may apply a second infusion as part of the same action.

Both infusions must be applied to the same target or to two targets you can touch.

If both infusions would normally require a standard action, applying both becomes a full-round action.

Each infusion counts normally against the target's infusion capacity.

15. Bulk Calibration

When using Bulk Infusion, increase the number of targets you may affect by your key ability modifier, minimum +1.

At 10 Guardian Hit Dice, each target affected by your Bulk Infusion may also receive one additional infusion, provided this does not exceed the target's infusion capacity.

16. Lingering Installation

When you switch away from Infusion Guardian, choose one active infusion you created.

That infusion continues functioning for 1 round per 2 Guardian Hit Dice instead of becoming dormant normally.

At 10 Guardian Hit Dice, you may choose two active infusions instead.

17. Workshop Memory

When you switch back to Infusion Guardian, you may immediately reactivate one dormant infusion you created without spending an action.

At 10 Guardian Hit Dice, you may reactivate two dormant infusions instead.

Reactivated infusions must still have remaining duration.

18. Stable Circuitry

Your infusions are difficult to disrupt.

Add half your Guardian Hit Dice as a bonus to the DC to dispel your infusions.

In addition, when one of your infusions would be suppressed by antimagic or a similar effect, it continues functioning for 1 round before becoming suppressed.

19. Efficient Discharge

Once per encounter, when one of your infusions would discharge, you may choose for it to remain active.

If you do, the discharge effect is halved, and the infusion's normal passive effect is suppressed until the start of your next turn.

An infusion preserved this way cannot discharge again during the same encounter.

20. Overclocked Infusion

Once per encounter, when you apply or discharge an infusion with a numerical effect, you may overclock it.

An overclocked infusion doubles one numerical bonus, damage value, healing value, resistance value, temporary hit point value, or movement value for 1 round.

After the overclock ends, the infusion immediately discharges or becomes dormant until the end of the encounter, whichever is worse for the user.

21. Field Refit

As a move action, you may move one active infusion you created from one willing creature, unattended object, or touched item to another valid target you can touch.

The infusion keeps its remaining duration.

If the new target is unwilling or the item is attended by an unwilling creature, you must succeed at a melee touch attack, and the target receives any saving throw normally allowed by the infusion.

22. Regalia Integration

Your infusions synchronize especially well with Regalia, Guardian weapons, and class-bound equipment.

When you apply an infusion to your own Regalia component, Guardian Weapon, Regalia staff point, Omni Wrench, bound ship system, construct companion, or similar class-bound item, treat your Guardian Hit Dice as 2 higher for that infusion's numerical effects and duration.

At 10 Guardian Hit Dice, infusions applied to such targets do not count against that target's infusion capacity for the first infusion only.

Infusion guardian

1. Resonance

Requirement: Must resonate with an individual or complete a significant bonding event.

The Guardian forms a spiritual connection with a significant individual, allowing the Guardian's user to gain an additional Guardian. This Guardian is added to the user's reserve and follows all normal rules for reserve and active Guardians. The process of Resonance requires a ritual or shared experience with the bonded individual, as determined by the GM.

2. Translator

The Guardian's knowledge extends to languages, allowing its user to gain fluency in two additional languages. These languages must be selected from those commonly available in the campaign world or granted at the GM's discretion based on the Guardian's nature or origin.

3. Tengu's Expertise

The Guardian imparts expertise in weaponry, allowing the user to wield any weapon they pick up with ease. The user gains proficiency with any weapon they wield for 24 hours, as long as they are in possession of the Guardian. This does not grant access to special abilities tied to specific class features, such as fighter weapon training.

4. Guardian Weapon

The Guardian manifests an independent spiritual weapon tied to its essence. This weapon appears in the user's hand or at their side — it is not an augment or enchantment applied to an existing weapon. The manifested weapon is treated as a +1 magical weapon and scales with the Guardian's Hit Dice: At 5 HD: +2 magical weapon. At 10 HD: +3 magical weapon. At 15 HD: +4 magical weapon. At 20 HD: +5 magical weapon. The weapon's form is chosen when the talent is selected (e.g., a sword, staff, or bow) and cannot be changed afterward. The weapon exists only while the Guardian is active and disappears if the Guardian is switched to reserve.

5. Guardian Magic

The Guardian grants access to limited spellcasting, but only for self-targeted effects. The user can cast spells granted by the Guardian as if they were spell-like abilities. At 3 HD: Choose two 1st-level self-targeting spells. At 6 HD: Add one 2nd-level self-targeting spell. At 9 HD: Add one 3rd-level self-targeting spell. Spells can be used a total number of times per day equal to the user's Charisma modifier, divided among all known spells.

6. Guardian's Instincts

The Guardian sharpens the user's senses, granting them heightened awareness. The user gains: +2 bonus on Perception checks to detect hidden enemies, traps, and dangers; the ability to sense the presence of traps within 30 feet as if using the spell detect traps. At 10 Guardian Hit Dice, the user gains blindsense out to 10 feet.

7. Spirit-Boosted Body

The Guardian enhances the user's vitality, granting them temporary hit points equal to half the Guardian's total Hit Dice.

These temporary hit points are refreshed whenever the Guardian is summoned or switched from reserve to active.

8. Grace

The Guardian channels its spiritual energy into the user, granting them a +4 enhancement bonus to Charisma and a +2 enhancement bonus to either Intelligence or Wisdom (chosen when the talent is selected). These bonuses increase by +2 and +1, respectively, for every 5 Guardian Hit Dice.

9. Born of Oath

The user gains one additional Guardian reserve slot. This slot follows all normal rules for reserve Guardians.

10. Awareness

The Guardian's user gains the benefits of a familiar. This includes the Alertness feat while the Guardian is active, as well as an increase to Perception and Reflex saves by +2. The user also gains access to the Guardian's enhanced senses, such as Darkvision (if the Guardian has it).

11. Lesser Alchemist Arts

The Guardian grants a discovery pool equal to **2 + 1/2 Guardian HD**. Discoveries selected through this talent are drawn from the **Paizo alchemist discoveries list** and represent crude, practical alchemy rather than true Alchemic Arts.

For the purpose of discoveries selected through this talent, the user treats their Guardian HD as their effective alchemist level. If a discovery requires bombs, mutagen, extracts, or another alchemist class feature, the Alchemic Guardian may provide a crude lesser version of that feature sufficient to use the

discovery, as defined by the talent or GM.

This talent does not grant alchemist class progression, extract progression, mutagen progression, poison use, brew potion, or any other alchemist class feature except as necessary to operate discoveries selected through Lesser Alchemist Arts.

12. Extra Alchemic Art

You gain one additional Alchemic Art for which you qualify.

13. Deep Refinement

Select one Alchemic Art you possess. Treat your Guardian HD as 2 higher for the purpose of that Art's level-dependent numerical effects.

14. Essence Reservoir

Prerequisite: Essence Containment

The maximum number of essences you may store via Essence Containment increases by 1. At 10 Guardian HD this increase becomes 2 instead.

15. Catalytic Memory

When this Guardian is dismissed or deactivated, one alchemical item effect, stored essence, Blood Ink inscription, active curse vial, or ongoing Alchemic Art effect you created or applied remains active for 1 additional round before expiring normally.

16. Rapid Preparation

Once per encounter, you may reduce the action required to apply, activate, or prepare an alchemical item or Alchemic Art by one step (full-round to standard, standard to move, move to swift).

17. Homunculus Assistant

Prerequisite: Homunculus

Your homunculus may perform one of the following tasks per round as a standard action: hold and maintain one active essence, carry and deliver one alchemical item to you or an adjacent ally, deliver a touch-range alchemical effect on your behalf, or aid another on your Craft (alchemy) check.

18. Compounded Application

When you apply or activate two alchemical items or Alchemic Arts that both require saving throws in the same round, the save DC of the second effect increases by 1. At 10 Guardian HD this bonus increases to 2.

19. Brace Integration

Prerequisite: Alchemist Brace

While this Guardian is active, your Alchemist Brace may suppress one additional simultaneous poison, disease, curse, or persistent affliction. Alternatively, any affliction currently suppressed by the Brace has its suppression duration extended by 24 hours.

20. Blood Ink Expansion

Prerequisite: Blood Ink

The maximum number of active Blood Ink inscriptions a single creature may carry increases by 1. At 10 Guardian HD, any bearer may trigger one Blood Ink inscription as an immediate action once per encounter rather than as a swift action.

21. Transmutation Lightning

Prerequisite: Alchemical Lightning

When you deal electricity damage to a creature via Alchemical Lightning, you may apply one of the following riders in addition to the normal damage:

- **Conductive Morph:** The target takes a –2 penalty on saving throws against alchemical effects and

electricity effects until the start of your next turn.

- **Muscle Seizure:** The target's base speed is reduced by 10 feet until the start of your next turn.
- **Nerve Flash:** The target takes a –2 penalty on attacks of opportunity and Reflex saving throws until the start of your next turn.
- **Metal Bloom:** If the target wears metal armor, carries metal weapons, or has the construct subtype, the electricity damage dealt by Alchemical Lightning increases by 1 per Guardian HD.
- **Shape-Stutter:** If the target is currently affected by a polymorph effect, transmutation effect, mutagen, or any ability that alters its physical form, you may attempt to dispel that effect as though using dispel magic, using your Guardian HD as your caster level.

At 10 Guardian HD, once per encounter when you apply a rider from this ability, you may apply one additional rider from this list to the same target simultaneously.

Level	Hit Dice	Special	Str/Dex Boost	Talents per Guardian	Jutsu known

Ninjutsu guardian

1. Resonance

Requirement: Must resonate with an individual or complete a significant bonding event.

The Guardian forms a spiritual connection with a significant individual, allowing the Guardian's user to gain an additional Guardian. This Guardian is added to the user's reserve and follows all normal rules for reserve and active Guardians. The process of Resonance requires a ritual or shared experience with the bonded individual, as determined by the GM.

2. Translator

The Guardian's knowledge extends to languages, allowing its user to gain fluency in two additional languages. These languages must be selected from those commonly available in the campaign world or granted at the GM's discretion based on the Guardian's nature or origin.

3. Tengu's Expertise

The Guardian imparts expertise in weaponry, allowing the user to wield any weapon they pick up with ease. The user gains proficiency with any weapon they wield for 24 hours, as long as they are in possession of the Guardian. This does not grant access to special abilities tied to specific class features, such as fighter weapon training.

4. Guardian Weapon

The Guardian manifests an independent spiritual weapon tied to its essence. This weapon appears in the user's hand or at their side — it is not an augment or enchantment applied to an existing weapon. The manifested weapon is treated as a +1 magical weapon and scales with the Guardian's Hit Dice: At 5 HD: +2 magical weapon. At 10 HD: +3 magical weapon. At 15 HD: +4 magical weapon. At 20 HD: +5 magical weapon. The weapon's form is chosen when the talent is selected (e.g., a sword, staff, or bow) and cannot be changed afterward. The weapon exists only while the Guardian is active and disappears if the Guardian is switched to reserve.

5. Guardian Magic

The Guardian grants access to limited spellcasting, but only for self-targeted effects. The user can cast spells granted by the Guardian as if they were spell-like abilities. At 3 HD: Choose two 1st-level self-targeting spells. At 6 HD: Add one 2nd-level self-targeting spell. At 9 HD: Add one 3rd-level self-targeting spell. Spells can be used a total number of times per day equal to the user's Charisma modifier, divided among all known spells.

6. Guardian's Instincts

The Guardian sharpens the user's senses, granting them heightened awareness. The user gains: +2 bonus on Perception checks to detect hidden enemies, traps, and dangers; the ability to sense the presence of traps within 30 feet as if using the spell detect traps. At 10 Guardian Hit Dice, the user gains blindsense out to 10 feet.

7. Spirit-Boosted Body

The Guardian enhances the user's vitality, granting them temporary hit points equal to half the Guardian's total Hit Dice.

These temporary hit points are refreshed whenever the Guardian is summoned or switched from reserve to active.

8. Grace

The Guardian channels its spiritual energy into the user, granting them a +4 enhancement bonus to Charisma and a +2 enhancement bonus to either Intelligence or Wisdom (chosen when the talent is selected). These bonuses increase by +2 and +1, respectively, for every 5 Guardian Hit Dice.

9. Born of Oath

The user gains one additional Guardian reserve slot. This slot follows all normal rules for reserve Guardians.

10. Lesser Jutsu

Requirement: Ninja Guardian or other feature that grants access to Ninja Arts.

The Guardian opens a lesser shinobi channel, granting the user access to the Legendary Games jutsu subsystem.

The user gains the basic jutsu progression, rules, and action structure of that subsystem, but treats their effective jutsu level as equal to **half their Guardian HD**, minimum 1, unless another class feature

provides a higher effective jutsu level.

Jutsu gained through Lesser Jutsu are not Ninja Arts. They are jutsu and follow the rules of the Legendary Games jutsu system.

If the user already has jutsu from another source, Lesser Jutsu does not grant a second pool or duplicate progression. Instead, while this Guardian is active, increase the user's effective jutsu level by +2 for the purpose of qualifying for and resolving jutsu effects, to a maximum of their character level.

Switching Guardians does not refresh jutsu uses, resources, cooldowns, prepared jutsu, or any other expendable part of the jutsu subsystem.

11. Shinobi Training

The user gains one base Ninja Art for which they qualify.

For Ninja Arts gained through this Guardian, use Guardian HD as the user's ninja level.

This talent may be selected multiple times. Each time, select a different Ninja Art.

12. Extra Ninja Art

Requirement: At least one Ninja Art.

The user gains one additional base Ninja Art for which they qualify.

For Ninja Arts gained through this Guardian, use Guardian HD as the user's ninja level.

This talent may be selected multiple times.

13. Deep Art Practice

Choose one Ninja Art gained through this Guardian.

Treat the user's Guardian HD as 2 higher for that Ninja Art's numerical effects, duration, range, and scaling.

This does not allow the user to qualify for Ninja Arts earlier than normal.

This talent may be selected multiple times. Each time, choose a different Ninja Art.

14. Guardian's Watch

While this Guardian is active, the user may maintain one additional observed target or observed area from the Observe Ninja Art.

At 10 Guardian HD, the user may maintain two additional observed targets or areas instead.

15. Instant Read

Once per encounter, the user may use Observe as a swift action instead of its normal action.

At 10 Guardian HD, this talent may be used twice per encounter.

16. Shared Observation

When the user gains a bonus or benefit from Observe, they may share half that bonus with one ally within 30 feet who can see or hear them.

At 10 Guardian HD, the user may share this benefit with two allies instead.

An ally cannot benefit from more than one Shared Observation at the same time.

17. Exploit Chain

Once per encounter, when the user consumes an Observe effect to use a Ninja Art, the Observe effect does not end.

At 10 Guardian HD, this talent may be used twice per encounter.

18. Silent Mudra

The user may perform jutsu signs, hand seals, breath patterns, or similar jutsu components subtly.

Creatures attempting to notice the user activating jutsu take a -2 penalty on Perception and Sense Motive checks.

At 10 Guardian HD, this penalty becomes -4.

This talent does not allow the user to use jutsu while paralyzed, helpless, bound, unconscious, silenced in a way that prevents required components, or otherwise unable to act.

19. Efficient Jutsu

Once per encounter, when the user activates a jutsu, they may reduce its resource cost by 1, minimum 0.

If the jutsu does not use a resource cost, the user instead gains a +1 bonus to its save DC or attack roll for that activation.

At 10 Guardian HD, this talent may be used twice per encounter.

20. Jutsu Reflex

Once per encounter, the user may activate one defensive jutsu as an immediate action if that jutsu could reasonably respond to the triggering attack, hazard, or effect.

The jutsu must still be legal to use and must target or affect the triggering situation.

At 10 Guardian HD, this talent may be used twice per encounter.

21. Lingering Jutsu

When the user switches away from this Guardian, they may choose one active jutsu effect created through this Guardian.

That effect persists for 1 additional round before ending, becoming dormant, or ceasing to benefit from this Guardian, as appropriate.

At 10 Guardian HD, the user may choose two active jutsu effects instead.

This talent does not refresh jutsu, extend expended resources, or allow a jutsu to be maintained without paying any normal required cost.

22. Hidden Armory

The user improves their access to mission tools.

Once per encounter, the user may treat one special ninja tool as available, chosen from smoke pellet, flash powder, wire, caltrops, grappling hook, disguise component, simple climbing aid, hollow needle, signal tag, or similar mundane tool.

The item exists only for resolving the user's Ninja Arts or jutsu-related actions. It cannot be sold, stockpiled, crafted from, shared, or preserved after the encounter.

At 10 Guardian HD, the user may access two such tools per encounter.

23. Mission Loadout

After 10 minutes of preparation, choose one Ninja Art gained through this Guardian.

The chosen Ninja Art gains one additional use during the next encounter or mission scene.

At 10 Guardian HD, the user may choose two Ninja Arts instead.

A Ninja Art with no limited uses instead gains a +1 insight bonus to one numerical effect for the scene.

24. Silent Equipment

While this Guardian is active, the user's worn armor, weapons, tools, and carried gear are spiritually dampened for stealth.

Reduce the armor check penalty applied to Stealth checks by 2, and reduce penalties caused by noisy gear, dangling equipment, or carried tools by 2.

At 10 Guardian HD, these reductions increase to 4.

This talent does not remove penalties from armor or gear the user is not proficient with.

25. Rooftop Doctrine

While using Wall-Runner or a similar movement Ninja Art, the user may move across rooftops, beams, ropes, ledges, tree branches, railings, rigging, uneven masonry, and narrow surfaces without reducing speed.

The user still falls if they fail any required Acrobatics or Climb check.

At 10 Guardian HD, the user gains a +4 bonus on Acrobatics checks made to move across such terrain.

26. Shadow Route

Once per encounter after using Silent Route, Prepared Exit, or a similar observed-route Ninja Art, the user may move up to half their speed without provoking attacks of opportunity from the first creature whose threatened area they leave.

At 10 Guardian HD, one ally following the same route before the start of the user's next turn gains the same benefit.

27. Falling Leaf Mastery

Requirement: Falling Leaf Ninja Art.

When the user reduces falling damage with Falling Leaf and takes no damage from the fall, they may land standing and immediately take a 5-foot step.

At 10 Guardian HD, they may instead move 10 feet, but this movement must end adjacent to a wall, shadow, surface, ledge, tree, rope, or similar terrain feature.

28. Greater Substitution

Requirement: Guardian HD 10.

When the user uses Smoke Substitution, Substitution Prep, Kage Afterimage, or a similar decoy Ninja

Art, they may strengthen the decoy.

The decoy lasts 1 additional round and imposes a –2 penalty on the first attack roll, Perception check, or Sense Motive check made to distinguish it from the user.

The decoy still does not threaten, flank, block movement, make attacks, take actions, activate items, or count as a creature.

29. Shinobi Apex

Requirement: Guardian HD 15.

Once per encounter, after using Observe, the user may immediately use one Ninja Art that requires Observe without ending the Observe effect.

If the Ninja Art would normally consume the Observe effect, it does not do so.

This talent cannot be used with the same Ninja Art more than once per encounter.

30. Tool-to-Jutsu Link

When the user activates a jutsu while using a ninja tool, thrown weapon, wire, tag, smoke effect, flash effect, or similar tool-based setup, they gain a +1 bonus on the jutsu's attack roll or save DC.

At 10 Guardian HD, this bonus increases to +2.

The tool must be meaningfully involved in the action; simply holding a tool is not enough.

31. Art-to-Jutsu Flow

Once per encounter, after the user successfully benefits from a Ninja Art, they may gain a +2 bonus on the next jutsu activation made before the end of their next turn.

This bonus may apply to one attack roll, save DC, concentration check, or caster/manifester-style check required by the jutsu.

At 10 Guardian HD, this talent may be used twice per encounter.

32. Jutsu-to-Art Flow

Once per encounter, after the user successfully activates a jutsu, they may gain a +2 bonus on the next Ninja Art check or attack roll made before the end of their next turn.

At 10 Guardian HD, this talent may be used twice per encounter.

24. Shadow Discipline

The user may treat Ninja Arts and jutsu granted through this Guardian as belonging to the same shinobi discipline for prerequisite purposes, but only while this Guardian is active.

This does not allow the user to ignore level requirements, resource costs, action costs, or subsystem restrictions.

At 10 Guardian HD, the user gains a +2 bonus on checks made to identify, counter, or understand ninja arts, jutsu, shinobi tools, hidden routes, ambush formations, and similar techniques.
